

Supplementary Materials S3: Simplified flowsheets of the methodologies developed for the assessment of socio-ecological vulnerability at the Mana river basin scale, based on the available data.

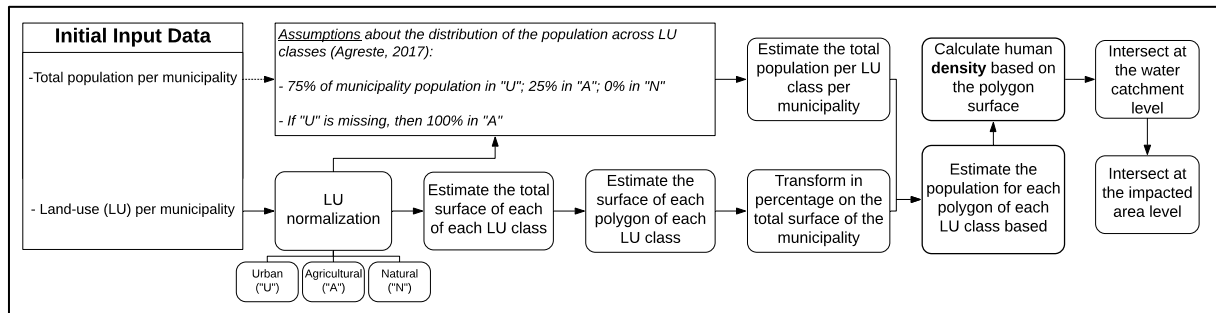

Figure S3.1. Flowsheet of the methodology developed for the assessment of population vulnerability based on land-use and demographic data.

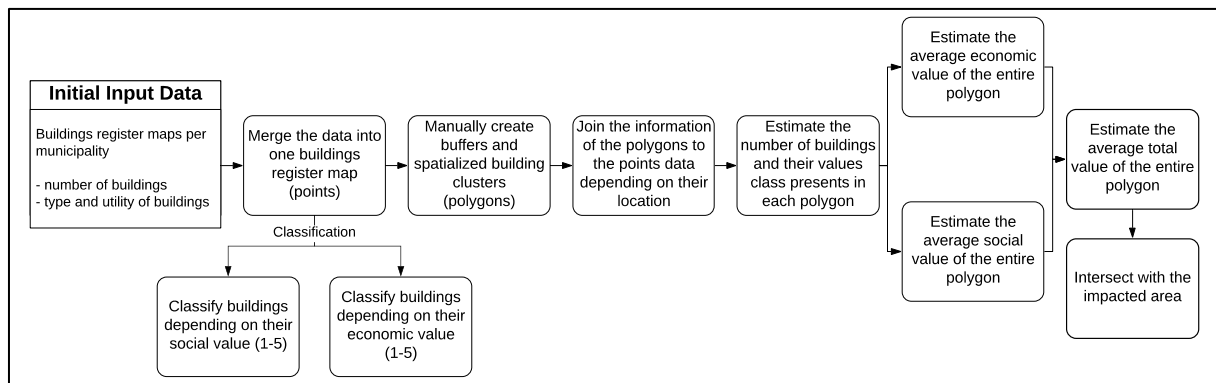

Figure S3.2. Flowsheet of the methodology developed for the assessment of building vulnerability based on buildings-related data concerning their concentration per polygon and their destination of use (e.g. residential, monuments, public offices).

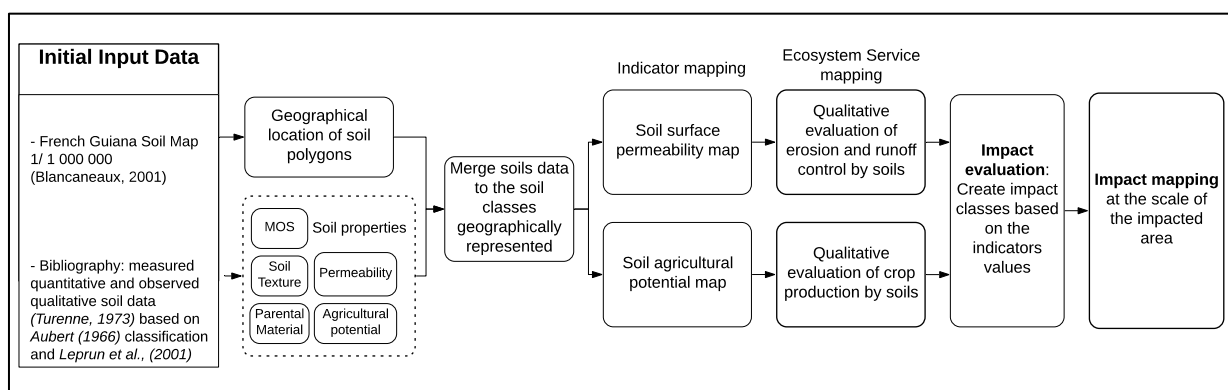

Figure S3.3. Flowsheet of the methodology developed for the assessment of soil ecosystem services vulnerability based on semantic and spatialized data.
