

**Table S1.** The Experimental material.

Nr	Entry Name	Type of variety	Origin/Year of release	Genealogy	Phenology	Abbreviation
1	Ranghino	Old	1887	Selection from Giapponino	early	RA
2	Gritna	Old	1972	Selection from Rocca	intermediate	GR
3	Alpe	New	1993	unknown	intermediate	AL
4	Carmen	New	2005	unknown	intermediate	CA
5	Russo	New	-	unknown	very early	RU
6	Lomellino <sup>a</sup>	New	1980	unknown	early	LO
7	Titanio <sup>b</sup>	New	1980	Stirpe 153 x Lieto	early	TI
8	Rodeo	New	2003	unknown	early	RO
9	Italmochi	New	1996	unknown	intermediate	IT
10	Topazio	New	-	-	-	TO
11	Miara	New	1988	-	-	MI
12	Baldo	Old	1977	Arborio x Stirpe 136	intermediate	BA
13	RN seme <sup>c</sup>	New	-	-	-	RN
14	Novara	Old	1930	Lady Wright x Vialone nero	intermediate	NO
15	Corbetta	Old	1954	Selection from Franco Roncarolo	intermediate	CO
16	Bertone	Old	1829	unknown	intermediate	BE
17	Rosa Marchetti UG	Old	1972	unknown	intermediate	RM UG
18	Chinese Originario	Old	1904	unknown	late	ChO
19	Rosa Marchetti CO	Old	1972	unknow	intermediate	RM CO
20	Baldo_CO	Old	1977	Arborio X Stirpe 136		BA CO
21	Arborio	Old	1967	Vialone X Lady Wright		AR
22	Mixture <sup>d</sup>	Mix				MIX

<sup>a</sup> Same as Comellino but Lomellino is assumed to be the correct name; <sup>b</sup> Same as Titano but Titanio is assumed to be the correct name; <sup>c</sup>Variety unknown, probably due to an error in name transcription at the gene bank; <sup>d</sup> composed of 15 varieties (Nano, Ranghino, Castelmochi, Chinese Originario, Vialone nero, Maratelli, Pierrot, Precoce Gallina, Bertone, Rosa Marchetti, Chinese Ostiglia, Dellarole, Lencino, Sancio P6 and Mirabelli)

**Table S2.** The four farms that hosted the trials

Farm Nr.	Farm Name	Farm Abbreviation	Agronomic management <sup>a</sup>	
			2019	2020
1	Cascine Orsine	CO	SD technique in dry paddy	Stale seedbed in flooded paddy
2	Terre di Lomellina	TL	Stale seedbed in flooded paddy	Green mulching
3	Marco Cuneo	MC	Stale seedbed in flooded paddy	Stale seedbed in flooded paddy
4	Una Garlanda	UG	Green mulching	Green mulching

<sup>a</sup> see text for details

**Table S3.** Agronomic management in the four farms hosting the trials over the two years.

Farm No.	Year	
	2019	2020
1	<p>stale seedbed in dry paddy (SD) technique</p> <ul style="list-style-type: none"> <li>- false seeding: 3 passages with harrow before sowing</li> <li>- sowing: 3 cm depth using (14 cm inter-row), at a rate of 20 g m<sup>-2</sup></li> <li>- after sowing: 2 passages with comb harrow</li> <li>- field flooding</li> </ul>	<p>stale seedbed in flooded paddy (SF) technique</p> <ul style="list-style-type: none"> <li>- false seeding: 2-3 passages with harrow before sowing</li> <li>- broadcasted at a rate of 20 g m<sup>-2</sup></li> </ul>
2	<p>stale seedbed in dry paddy (SD) technique</p> <ul style="list-style-type: none"> <li>- sowing: 6 cm depth using (14 cm inter-row), at a rate of 20 g m<sup>-2</sup></li> <li>- after sowing: 2 passages with comb harrow</li> <li>-field flooding</li> </ul>	<p>green mulching technique</p> <ul style="list-style-type: none"> <li>- sowing a mixture of vetch and ryegrass (<i>Vicia villosa</i> and <i>Lolium multiflorum</i> Lam) the autumn before</li> <li>- sowing: in the standing cover crop in rows 3 cm depth at a rate of 20 g m<sup>-2</sup></li> <li>- after rice germination the cover crops were cut</li> <li>- field flooding</li> </ul>
3	<p>stale seedbed in dry paddy (SD) technique</p> <ul style="list-style-type: none"> <li>- false seeding: 2-3 passages with harrow before sowing</li> <li>- sowing: 3 cm depth using (14 cm inter-row), at a rate of 20 g m<sup>-2</sup></li> <li>- after sowing: 2-3 passages with comb harrow</li> <li>- field flooding</li> </ul>	<p>stale seedbed in dry paddy (SD) technique</p> <ul style="list-style-type: none"> <li>- false seeding: 2-3 passages with harrow before sowing</li> <li>- sowing: 3 cm depth using (14 cm inter-row), at a rate of 20 g m<sup>-2</sup></li> <li>- after sowing: 2-3 passages with comb harrow</li> <li>- field flooding</li> </ul>
4	<p>green mulching technique</p> <ul style="list-style-type: none"> <li>- sowing a mixture of vetch and ryegrass (<i>Vicia villosa</i> 30%, <i>Sinapis alba</i> 20% and <i>Lolium multiflorum</i> Lam 50%) the autumn before</li> <li>- sowing: in the crushed cover crop (roller crimper) broadcasting at a rate of 20 g m<sup>-2</sup></li> <li>- field flooding</li> <li>- after 5-7 days, the rice field is drained, and kept dry for 7-14 days to allow rice germination</li> <li>- field flooding</li> </ul>	<p>green mulching technique</p> <ul style="list-style-type: none"> <li>- sowing a mixture of vetch and ryegrass (<i>Vicia villosa</i> 30%, <i>Sinapis alba</i> 20% and <i>Lolium multiflorum</i> Lam 40%, <i>Secale cereale</i> 10%) the autumn before</li> <li>- sowing: in the mulched cover crop (flail-mower) broadcasting at a rate of 20 g m<sup>-2</sup></li> <li>- field flooding</li> <li>- after 5-7 days, the rice field is drained, and kept dry for 7-14 days to allow rice germination</li> <li>- field flooding</li> </ul>

**Table S4.** People who evaluated the individual plots classified by gender (upper part) and by profession (lower part) (F =farmers, T = technicians, H = hobbyists, R = researchers, S = Students.
