

A CHECKLIST/CATALOGUE

with an overview of sustainable solutions that may be applied
in the design of transport hubs in small towns in the **I dimension – ACCESSIBILITY**

ACCESSIBILITY

		compulsory	optional	needed			compulsory	optional	needed
TA	transport accessibility				PS	passenger service			
BS	allocated bus stands				WR	waiting room building			
CS	cab stands				OB	possibility to observe bus stands from the waiting room			
DP	diversified parking lots, incl.:				WC	toilet for travelers			
PP	public parking lots				TS	traveler service point			
K&R	Kiss & ride stands				TO	ticket office			
P&R	Park & ride parking				TM	ticket machines			
PP	pedestrian priority, incl.:				IB	information board with timetables			
PS	pedestrian sidewalks				RS	roofed bus shelters			
PC	designated and marked pedestrian crossings				LL	luggage lockers			
IC	infrastructure for cyclists, incl.:				CS	comfortable seats and street furniture			
BP	bicycle or pedestrian & bicycle path				OL	outdoor lighting			
BR	bicycle rugs				MO	monitoring			
CB	City/electric bicycle/scooter stations				WG	waste garbage cans			
OS / TA	other solutions to improve transportation accessibility				OS / PS	other solutions to improve passenger service			
FD	assistive technologies and facilities for PwD and PwSN				IA	inclusive and interactive activities			
MT	multimedia info terminal adapted to the needs of PwD ¹⁾				TI	tourist information point			
					TF	tactile city plan			
SN	space dedicated for non-neurotypical persons and accompanying persons				AE	advertising and outdoor exhibition stands			
HS	horizontal stripes on glazing to protect the visually impaired				SF	street furniture / seats / benches / parklet			
WC	toilet adapted to the needs of PwD				WF	water fountain			
WC	toilet adapted to the needs of a parent with a child				FP	kiosk / food service point			
SD	signage adapted to the needs of PwD, incl.:				LG	landscaped greenery			
TM	tactile markings of pedestrian crossings / bus stands				OS / IA	other solutions to improve inclusive and interactive activities			
TP	tactile pavements and guidance lanes								
BS	signage in Braille								
AD	audio description signage								
AI	information / audible signals								
IL	induction loop								
LC	no or lowered curbs								
PD	parking lot for the disabled								
OS / FD	other solutions to improve assistive technologies and facilities for PwD and PwSN								

A CHECKLIST/CATALOGUE

with an overview of sustainable solutions that may be applied
in the design of transport hubs in small towns in the **II dimension – ECOLOGY**

ECOLOGY

		compulsory	optional	needed			compulsory	optional	needed
GS	'green' solutions				RS	retention of stormwater			
BAI	biologically active area increase				RG	rain garden			
GP	'green' partitions, incl.:				RT	retention tank / basin			
GR	green roofs				RR	RP use of rainwater for watering plants, RR use of water from green roofs in the building water cycle			
GW	green walls								
GS	green bus shelters / green canopies								
GL	greening and landscaping incl.:				RP	use of rainwater for watering plants			
TG	tall greenery (trees)				PP	permeable or unsealed pavements (overgrown with vegetation)			
MG	medium-high greenery (shrubs, tall grasses, etc.)								
LG	low vegetation (lawns, flower meadows, perennial plants, grasses, etc.)				OS / RS	other solutions conducive to retention			
CP	climbing plants								
PC	plants in containers								
OS / GS	other solutions to increase the amount of greenery/ecological connectivity								
RE	energy efficiency / renewable energy sources				RC	recycling			
SF	solar or photovoltaic panels / rooftops				RM	recycled and/or recyclable building materials			
SL	solar lighting				RW	recycled waste containers			
EI	energy-efficient electrical / thermal installations				OS / RC	other recycling solutions			
CSt	Electric car charging stations								
OS / RE	other solutions to foster energy efficiency and self-sufficiency								

A CHECKLIST/CATALOGUE

with an overview of sustainable solutions that may be applied
in the design of transport hubs in small towns in the **III dimension – FUNCTIONALITY**

FUNCTIONALITY

		compulsory	optional	needed			compulsory	optional	needed
TS	safety of travelers				TC	comfort of travelers			
PP	priority for pedestrians				TM	ticket machines			
RC	reducing the number of pedestrian crossings				WC	public toilet			
RP	raised platforms / lack of curbs / raised pedestrian crossing				SB	weather-sheltered bus stops			
NS	non-slip pedestrian surfaces and pavements				PC	protective canopies against sun and rain			
BP	separated bicycle path				CS	comfortable seats and street furniture			
SV	chicanes and humps to slow down vehicle traffic				LG	landscaped greenery			
OS / TS	other design solutions to improve safety of travelers				CI	infrastructure for cyclists (stands, city cycle station)			
					WF	water fountains			
					OS / TC	other solutions to improve the comfort of travelers			

A CHECKLIST/CATALOGUE

with an overview of sustainable solutions that may be applied
in the design of transport hubs in small towns in the **IV dimension – IDENTITY**

IDENTITY

		compulsory	optional	needed			compulsory	optional	needed
CSI	city symbols and identification				GL	geographic location			
CC	city crest				GT	geographical positioning / identifying 'totem' sign			
CF	city flag				CG	bus station as 'the city gate'			
CI	city logo / official identification of the city								
HT	history				AT	architectural and building traditions			
MC	Multiculturalism – <i>social history</i>				WA	traditional architectural forms and details			
HR	historic roads				LM	local building materials			
MM/HD	micro-museum/ heritage display				TC	traditional colors in architecture			
LT	local traditions (to be defined depending on the site)				LL	local landscape			
	Famous city-inhabitants/ historic figures				NV	native vegetation, including:			
					MV	field and meadow vegetation			
					RV	roadside vegetation			
					RV	roadside vegetation			
					TH	trees compatible with the natural habitat
