Table S2. The example of learning results for one agricultural field (Figures 3-5): the probability of Landsat scenes suitability for calculations is given. The probability is measured from 0 to 1.

Landsat scene (year_month day_satellite_path row)	Gradient boosting prediction	Neural network prediction	Manual selection

Table S4 Machine learning results for the acceptance sample (Figure 6) part 2: the probability of Landsat scenes suitability for calculations is given. The probability is measured from 0 to 1; gb - gradient boosting; nn - neural network; ms - manual selection.
