Table S8. Mean and median CO₂ concentration values of the SIM, DA_FLUX experimental results, and observations from TCCON, tower, and aircraft.

Observation Type	Experiment	Mean (ppm)	Median (ppm)
TCCON	SIM	403.86	404.16
	DA_FLUX	403.67	403.95
	CT2017	403.39	403.55
	Observations	403.49	403.70
Tower	SIM	409.20	408.98
	DA_FLUX	407.74	408.08
	CT2017	408.49	409.66
	Observations	407.79	408.6
Aircraft	SIM	403.99	404.23
	DA_FLUX	404.14	404.33
	CT2017	404.08	404.41
	Observations	404.19	404.43

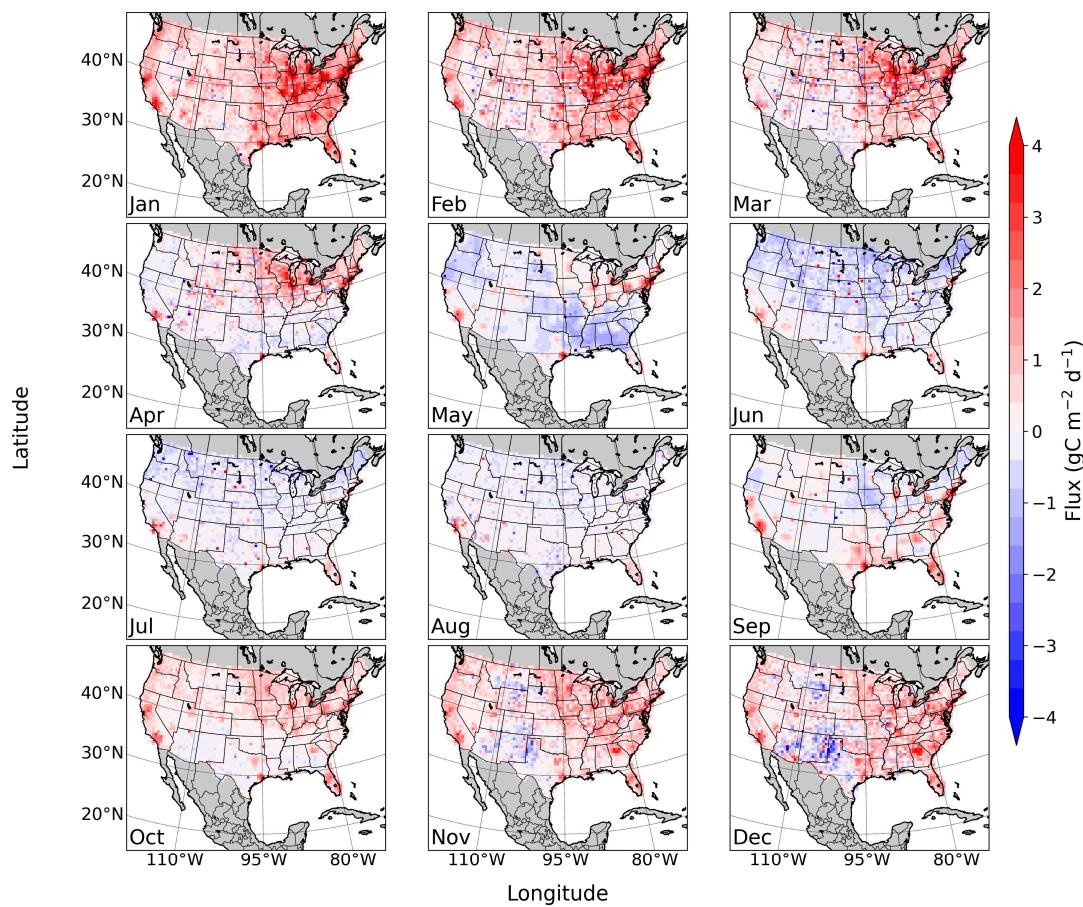

Figure S1. Spatial distributions of monthly mean posterior CO₂ fluxes estimated by the DA_FLUX experiment over the contiguous United States in 2016.

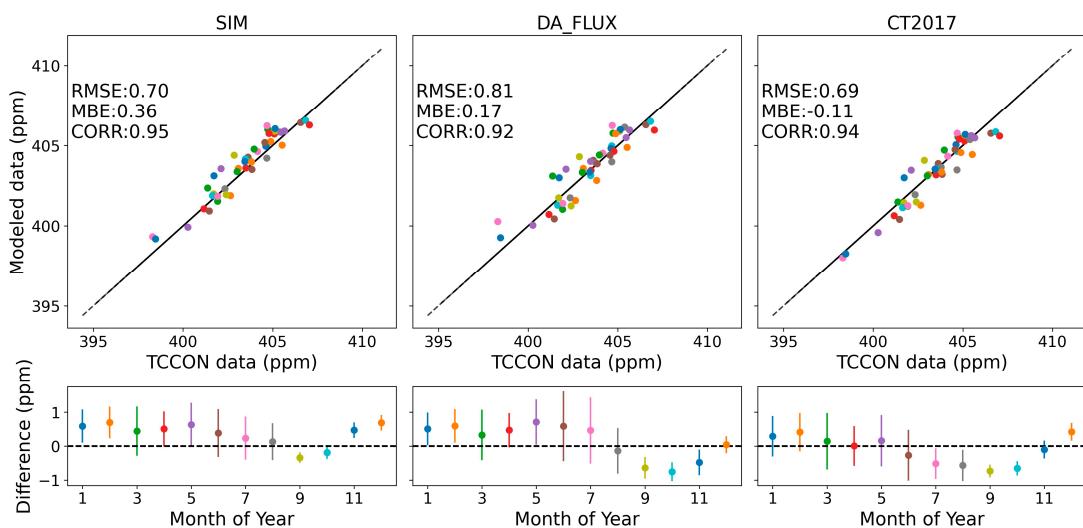

Figure S2. Comparison of the monthly mean TCCON observations and the modeled XCO₂ from the SIM, DA_FLUX experiment and CT2017. The top part shows scatter plots of the modeled XCO₂ against the TCCON observations. In the lower part, dot represents the mean bias error between the modeled XCO₂ and the TCCON observations, bar represents the standard deviation of the bias errors.

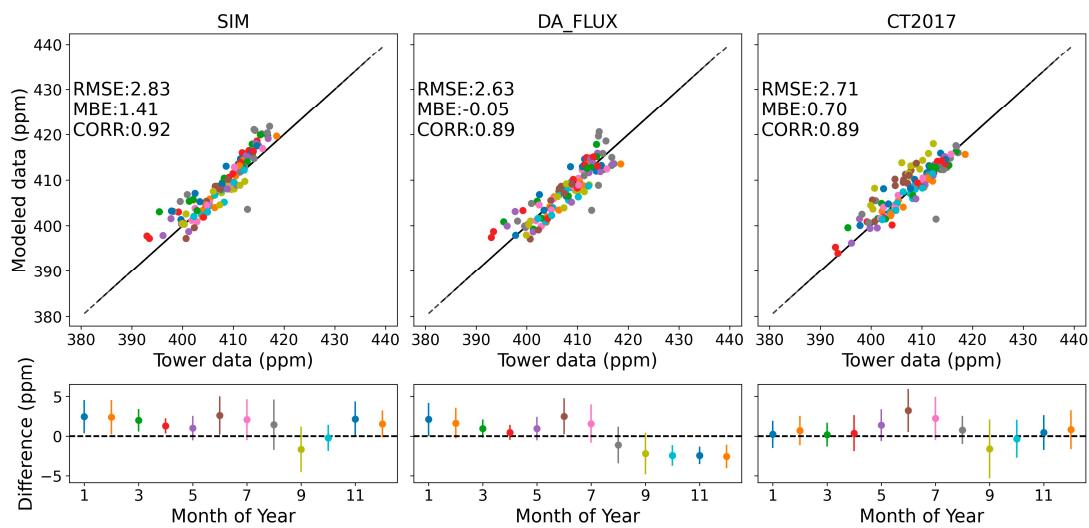

Figure S3. Comparison of the monthly mean tower observations and the modeled CO₂ concentrations from the SIM, DA_FLUX experiment and CT2017. The top part shows scatter plots of the modeled CO₂ concentrations against the tower observations. In the lower part, dot represents the mean bias error between the modeled CO₂ concentrations and the tower observations, bar represents the standard deviation of the bias errors.

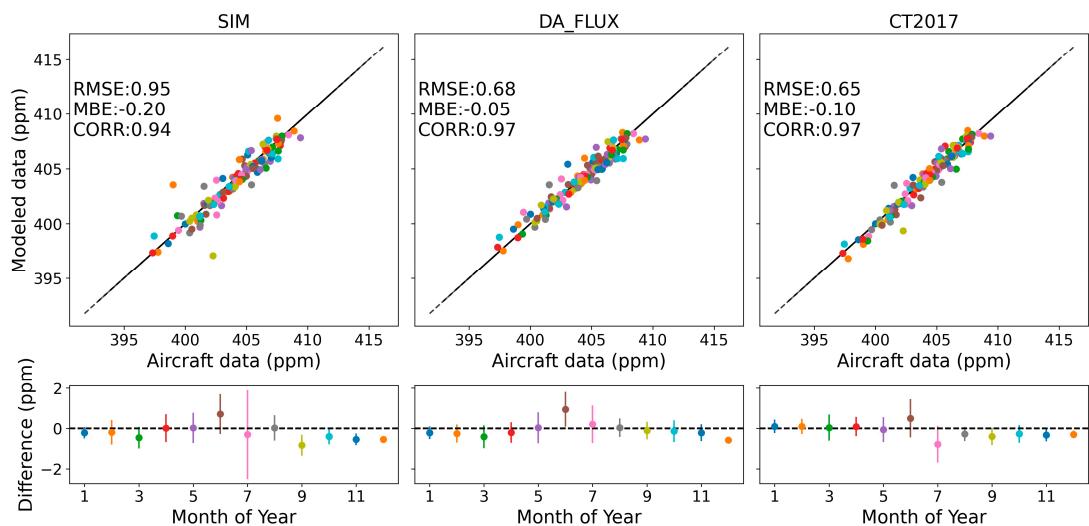

Figure S4. Comparison of the monthly mean aircraft observations and the modeled CO₂ concentrations from the SIM, DA_FLUX experiment and CT2017. The top part shows scatter plots of the modeled CO₂ concentrations against the aircraft observations. In the lower part, dot represents the mean bias error between the modeled CO₂ concentrations and the aircraft observations, bar represents the standard deviation of the bias errors.
