Footnote

Modified from TD.10787 to replace maltodextrin with cellulose to make diet essentially free of carbohydrate. Diet has a 2:1 ratio of n-3 to n-6 fatty acids and a 1.5:1 ratio of fat to protein + carbohydrate. Compared to TD.10787, TD.10911 has the same % fat (wt/wt) but has a higher % kcal from fat, because carbohydrate was removed and replaced with cellulose.
