

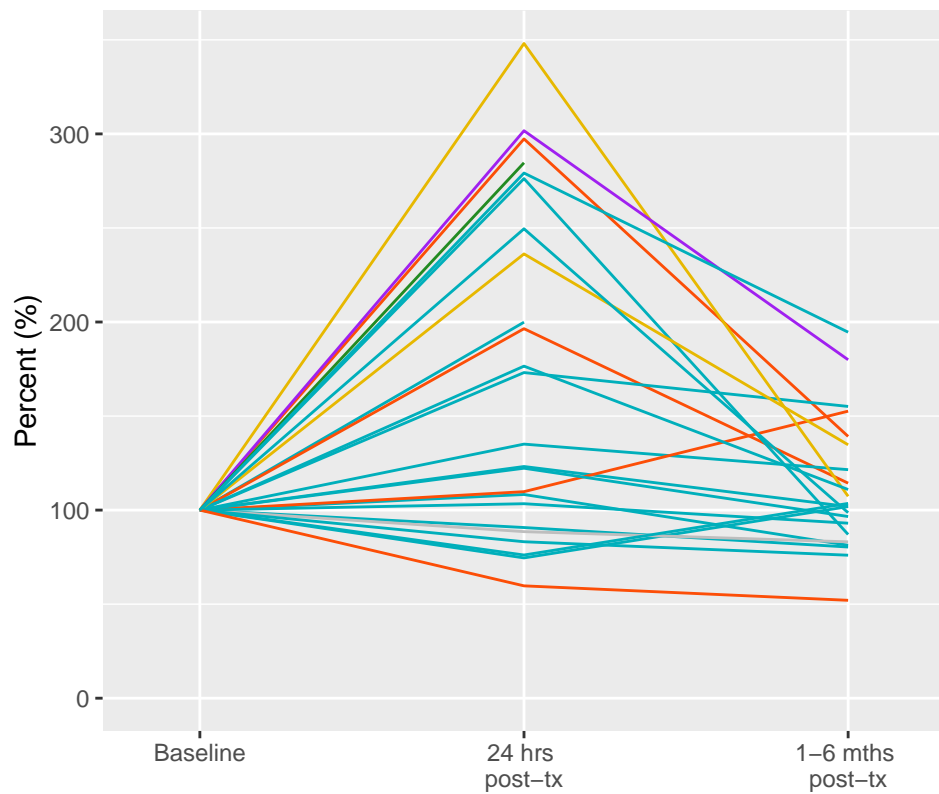

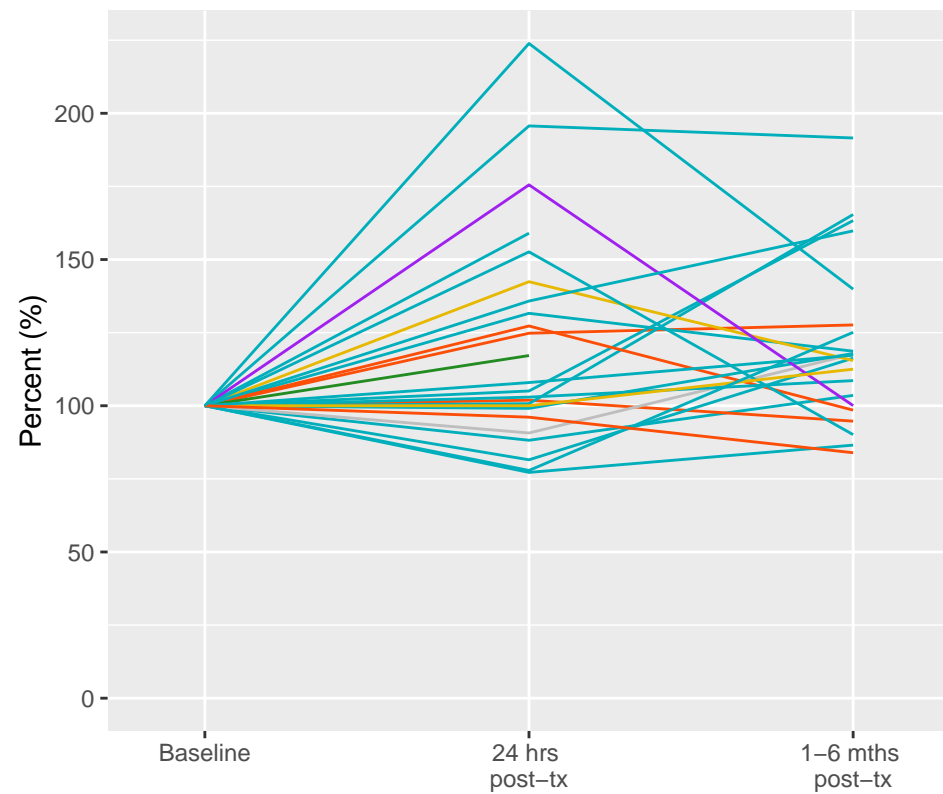

Figure S7. Longitudinal profiles of all plasma proteins, prior to and post-CRYO (n=25 patients). Results for each protein are expressed as a % of the reference baseline (TP2; 100%) and are shown with different colours indicating the different histological subtypes of RCC.

Uniprot ID: P10145, analyte: IL8

Uniprot ID: Q07011, analyte: TNFRSF9

Uniprot ID: Q02763, analyte: TIE2

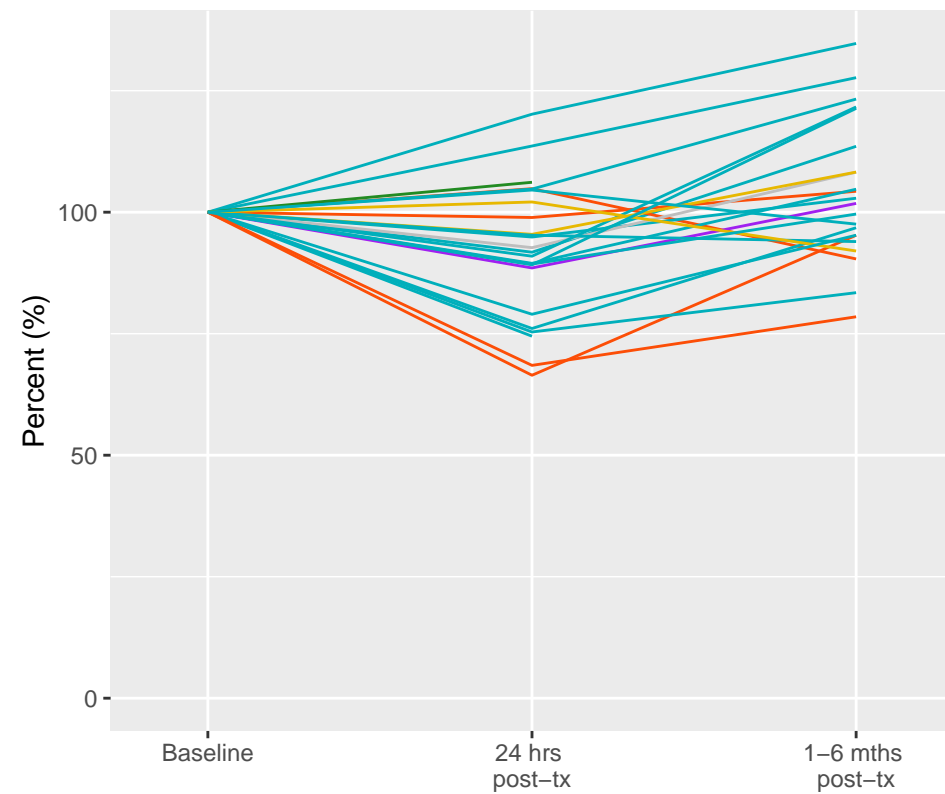

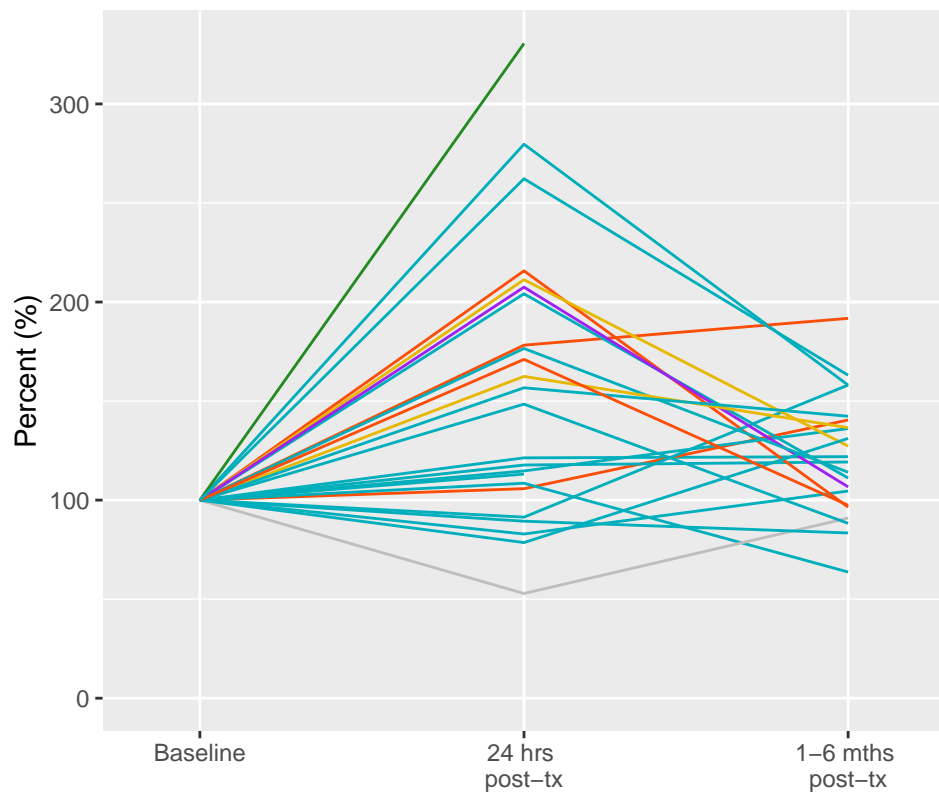

Figure S5

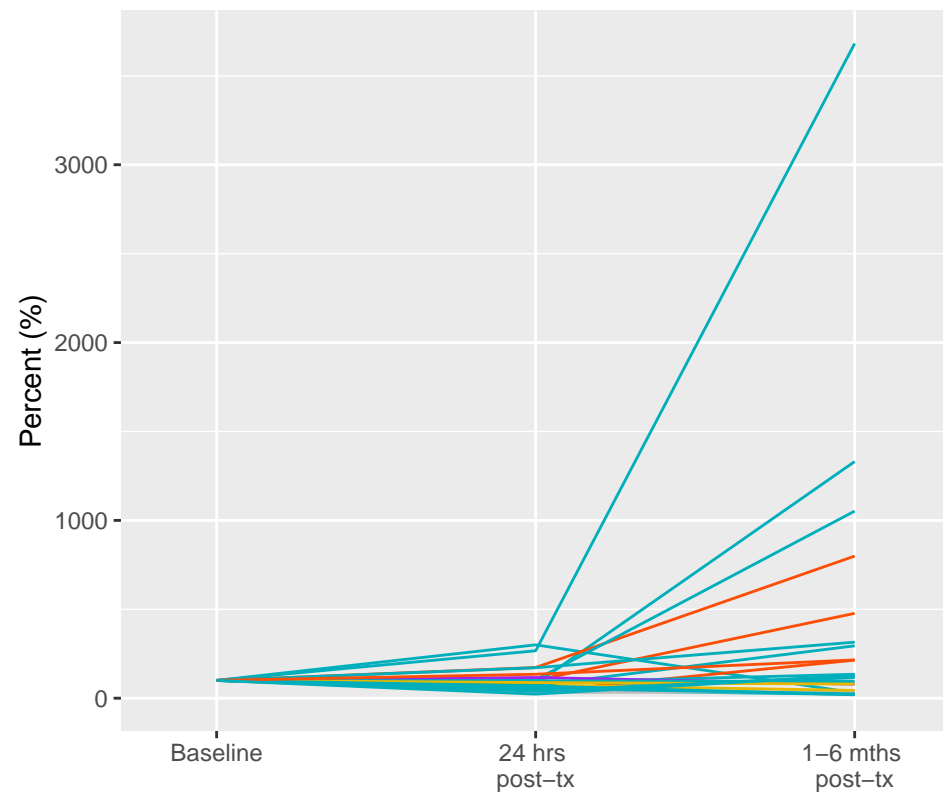

Histology

| | | | | | |
|-------------|------------|-------|-----------|-------------------|---------|
| Chromophobe | Clear cell | Mixed | Papillary | TFE translocation | Unknown |
|-------------|------------|-------|-----------|-------------------|---------|

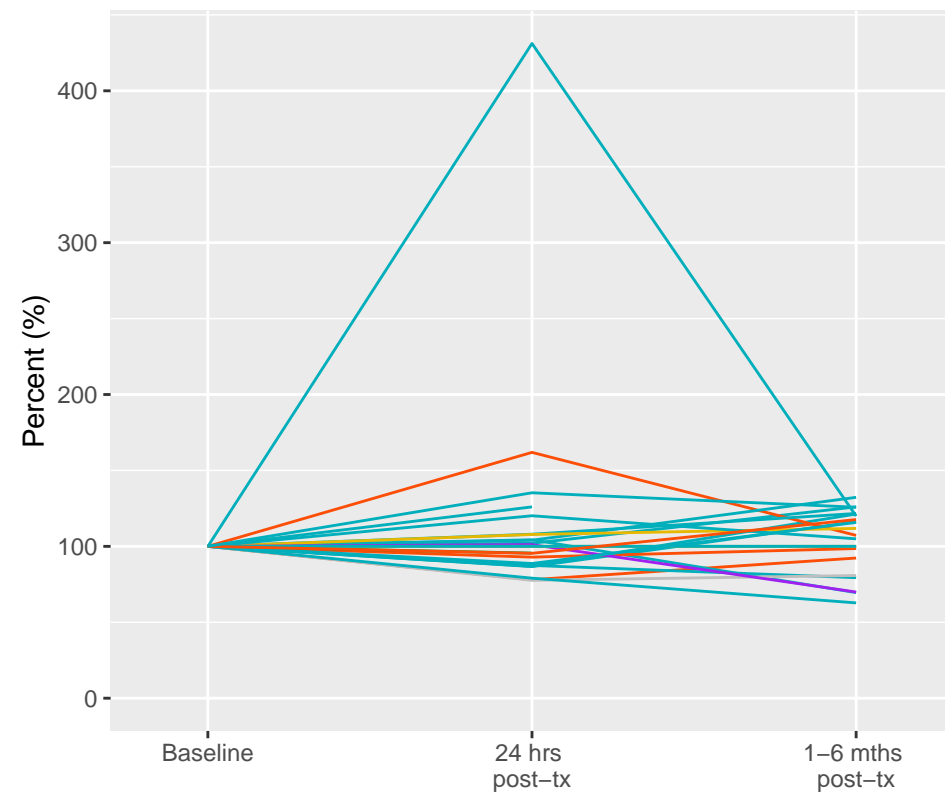

Uniprot ID: P80098, analyte: MCP-3

Uniprot ID: P29965, analyte: CD40-L

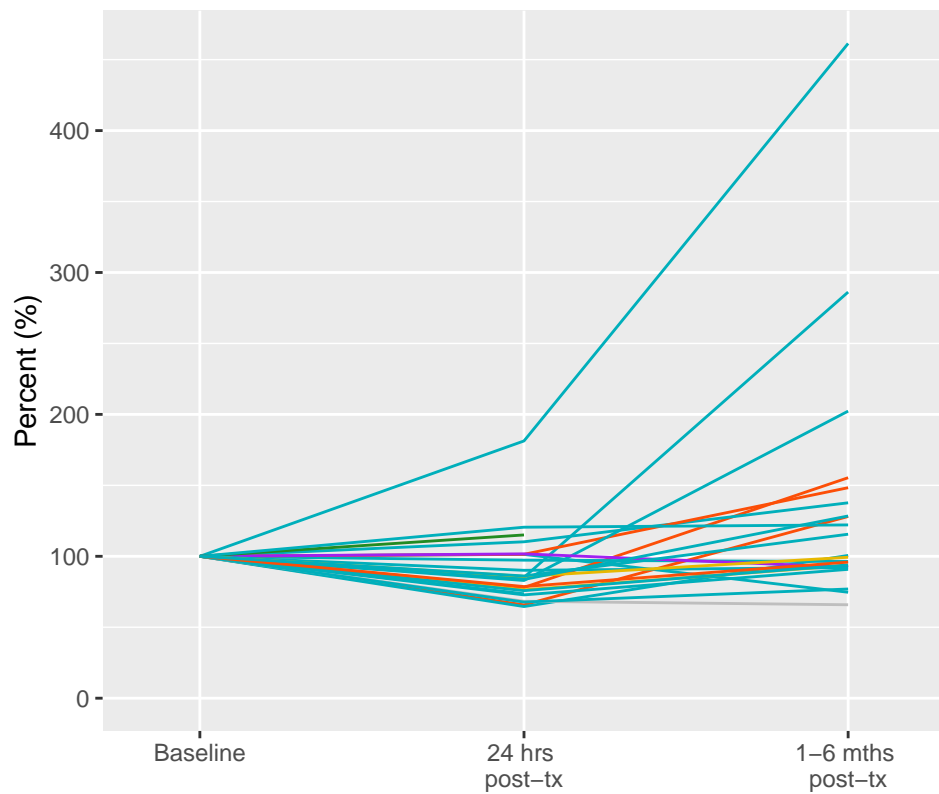

Uniprot ID: P01583, analyte: IL-1 alpha
