

Benign Tumors in Long-Term Survivors of Retinoblastoma

Milo van Hoefen Wijsard, Sara J. Schonfeld, Flora E. van Leeuwen, Annette C. Moll, Armida W. Fabius, David H. Abramson, Johanna M. Seddon, Jasmine H. Francis, Margaret A. Tucker, Ruth A. Kleinerman and Lindsay M. Morton

Supplementary Materials:

Table S1. Frequency and patterns of benign tumors* among nonhereditary retinoblastoma survivors who reported at least one benign tumor during follow-up.

| First Benign Tumor | Second Benign Tumor | Subsequent Benign Tumors | N People |
|--------------------|---------------------|----------------------------------|----------|
| Lipoma | | | 1 |
| Lipoma | Lipoma | 3rd Lipoma | 1 |
| Leiomyoma | | | 5 |
| Leiomyoma | Leiomyoma | | 1 |
| Fibroma | | | 1 |
| Osteochondroma | | | 4 |
| Meningioma | | | 2 |
| Fibroadenoma | Fibroadenoma | 3rd Fibroadenoma & 4th Leiomyoma | 1 |

*Morphology codes for 22 benign tumors in nonhereditary retinoblastoma survivors; 8 leiomyomas (ICD-O-3 morphology: 8890), 4 lipomas (8850), 4 osteochondromas (9210, 9920), 3 fibroadenomas (9010), 2 meningiomas (9530) and 1 fibroma (9540).
