

Use of Patient-Derived Organoids as a Treatment Selection Model for Colorectal Cancer: A Narrative Review

Sara Furbo, Paulo César Martins Urbano, Hans Henrik Raskov, Jesper Thorvald Troelsen, Anne-Marie Kanstrup Fiehn and Ismail Gögenur

Table S1. Reagents and solutions needed for organoid medium.

| Reagents and solutions |
|---|
| DMEM/F12 |
| Ultraglutamine I |
| HEPES buffer |
| Penicillin |
| Streptomycin |
| Noggin |
| R-Spondin1 |
| B27 without vitamin A |
| N-acetylcysteine |
| Nicotinamide |
| Human EGF |
| ALK5 inhibitor (TGF- β Type I Receptor inhibitor) |
| P38 inhibitor |
| Prostaglandin E2 |
| WNT |
