

A

B

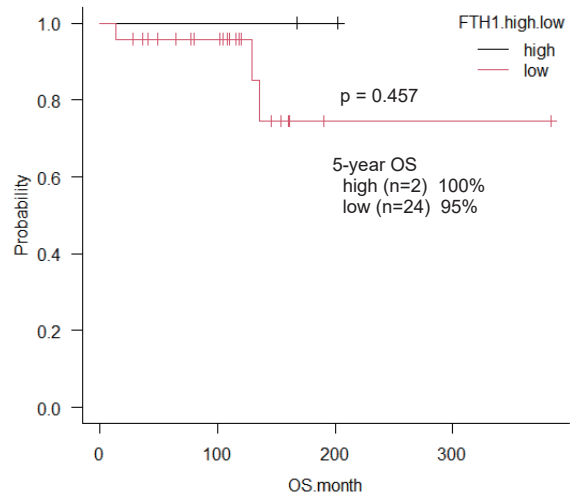

Figure S6. FTH1 expression is not significantly associated with poor prognosis of synovial sarcoma.

A, B. Kaplan-Meier curves showing the relationship between FTH1 mRNA expression levels and OS of all patients with synovial sarcoma treated in our institute (A; n = 39) or of patients with localized synovial sarcoma treated in our institute (B; n = 26).

Subjects were dichotomized into FTH1 high (z-score  $\geq 2$ ) and FTH1 low (z-score  $< 2$ ) groups.

Statistical significance was calculated using a log-rank test. The P-value is indicated in each figure.
