

Figure S8. SHARPIN mRNA expression is not significantly associated with OS of patients with synovial sarcoma treated in our institute.

Kaplan-Meier curve showing the relationship between SHARPIN mRNA expression and OS of patients with localized synovial sarcoma treated in our institute (n = 26). Subjects were dichotomized into SHARPIN high (z-score  $\geq 2$ ) and SHARPIN low (z-score  $< 2$ ) groups. Statistical significance was calculated using a log-rank test. The P-value is indicated.
