

Supplementary Figures

**Supplementary Figure S1: Sex differences in gene expression and pathways among molecular subtypes of DLBCL after removing genes located on X and Y chromosome.** A, Venn diagram showing the distribution of the differentially expressed genes among the DLBCL subtypes (adj. p-value <0.05). B, Venn diagram depicting the significant pathways showing a sex differentiation among the DLBCL subtypes as analyzed by GSEA (adj. p-value <0.05).
