

Figure S1. Survival curve of overall survival, cancer specific survival, and cancer-related relapse-free survival comparing the sarcopenia and non-sarcopenia groups.

Survival curves for overall survival (OS), cancer-specific survival (CSS), and cancer-related relapse-free survival (CRRFS) were compared between the sarcopenia and non-sarcopenia groups without considering obesity. Red and blue lines represent sarcopenia and non-sarcopenia groups, respectively. There were no significant differences in the OS, CSS, or CRRFS between the two groups.
