Scanning electron microscopy

Sample **P2** - 4000PEOT50PBT50_20wt% IL.

1000x

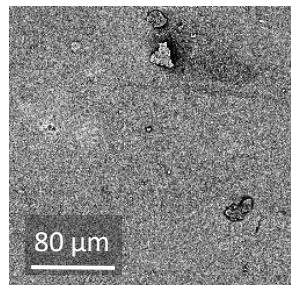

5000x

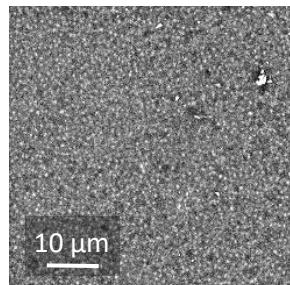

Sample **P4** - 4000PEOT77PBT23_20wt% IL

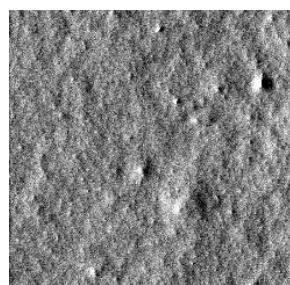

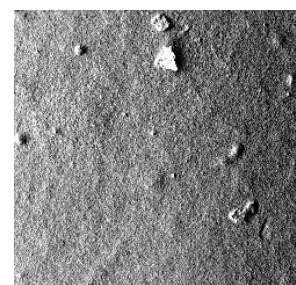

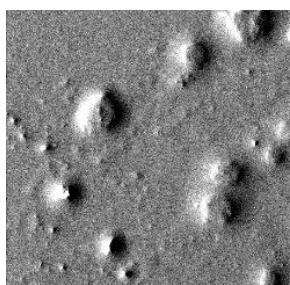

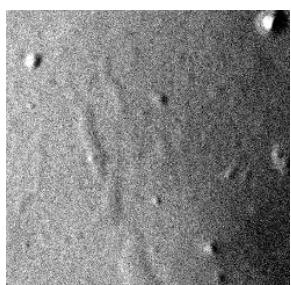

1000x

5000x

Topographic direction A Image

Topographic direction B Image

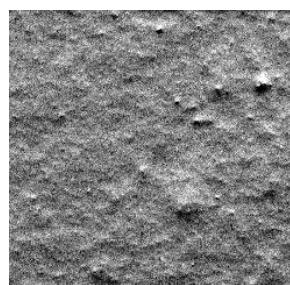

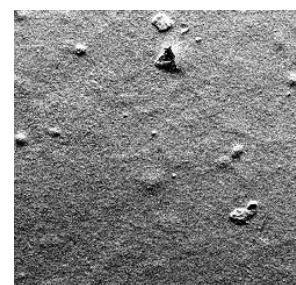

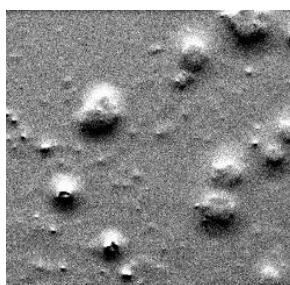

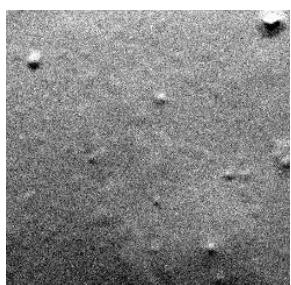

Figure S 1. Example of SEM images of sample **P2** and sample **P4** with 20wt% IL, in two areas with different magnifications. Images recorded in normal imaging mode (left) and in topographic mode, in perpendicular directions (middle and right), highlighting the surface roughness and embedded anisotropies with different backscattering intensity. Irradiation mode: point. The scale bars are identical for all photos at the same magnification.

Differential scanning calorimetry

Table S1. Temperature cycle of the pure [BMIM][Tf₂N] sample for DSC analysis.

Run	Mode	Heating/Cooling			Isothermal		Notes
		Start T (°C)	End T (°C)	Rate (°C min ⁻¹)	T (°C)	Time (min)	
1	heat	0	250	15			
	isothermal				250	1	
	cool	250	-100	15			
	isothermal				-100	10
