

| Data to be extracted | Data |
|---|------|
| Title | |
| Author(s) | |
| DOI | |
| Year of publication | |
| Study objective as stated | |
| Electrospun Material | |
| Fiber surface topography modification method | |
| Other modifications that arose from the topography modification (e.g. chemical modification) | |
| Other modifications performed independently from topography modification that may have a bearing on the results | |
| Fiber surface topography characterization performed, if any | |
| Results of surface topography characterization, if any | |
| Control/comparator used for cell assay | |
| Cells used for study | |
| Cell viability outcome, if any | |

| | |
|--|--|
| Cell adhesion outcome, if any | |
| Cell proliferation outcome, if any | |
| Cell differentiation outcome, if any | |
| Other cell behavior data | |
| Author conclusions regarding effect of surface topography on cells | |
