The authors retract their recent published article [1] in *Agronomy*. After checking, the authors found that they incorrectly used the raw data in the process of preparing the figures and tables, and more precisely that they inadvertently exchanged the data for the F and B treatment in all the figures and tables, which eventually led to unreliable results and conclusions. The authors apologize for any inconvenience caused by the removal of this article.

The Editor-in-Chief and Academic Editors of *Agronomy* have checked this case. The Editor-in-Chief has approved the retraction. MDPI is a member of the Committee of Publication Ethics and takes the responsibility of enforcing strict ethical policies and standards very seriously. To ensure the addition of only high-quality scientific works to the field of scholarly publication, this article [1] is retracted and marked accordingly.
