

Supplementary Figure 2. Yield performance comparison plot of stover yield (left) and grain yield versus grain moisture evaluated on twenty lines from divergent origins European Atlantic (Atlant), European Mediterranean (Medit), US Corn Belt (US) and commercial hybrids (Hybrid) in four environments across 2010 and 2011 in Galicia, Spain. Vertical axis is grain moisture (g/kg) and horizontal axis are stover yield (left) and grain yield (right) in kg/Ha.
