

List of Supplementary figures

Supplementary Figure S1. Relative percentage of HA fluorescence components under different organic materials and their incorporation depths. Different letters indicate significant differences between samples ($p < 0.05$). Values are mean \pm errors ($n=4$).

Supplementary Figure S2. Relative percentage of HA fluorescence components under different organic materials and their incorporation depths. Different letters indicate significant differences between samples ($p < 0.05$). Values are mean \pm errors ($n=4$).
