

Supplementary Figure S1. Cre expression in the cross between CamK2-CreErt2 and tdTomato mice and tdTomato fluorescence showing Cre recombinase expression in both controls and CKO (i). Female controls injected with corn oil showing Cre expression (ii). Male controls injected with corn oil showing Cre expression (iii). Cre expressing females injected with tamoxifen showing Cre expression (iv). Cre expressing males injected with tamoxifen showing Cre expression. The Cre recombinase was leaky in both the corn oil and tamoxifen injected mice. Scale bars, 20μm.
