

Figure. Relative gene expression of *myod1* along the regeneration experiment in white skeletal muscle from day 0 (time of injury) to day 30. Data are presented as means \pm SEM (n=10). Different letters indicate significant differences (p<0.05).

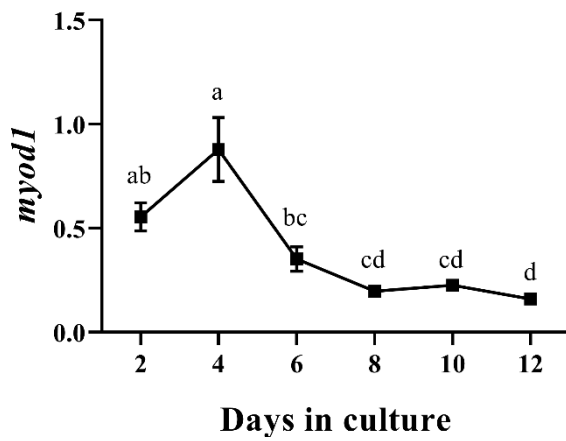

Figure. Relative gene expression of *myod1* along the primary culture of myocytes. Data are presented as means \pm SEM (n=6). Different letters indicate significant differences (p<0.05).
