

Supplementary Figure S1. Integrin $\alpha 6\beta 4$ is primarily expressed in the arterial vessels of adult mouse retina. **(A–B)** Integrin $\alpha 6\beta 4$ is expressed in a subset of vessels of adult mouse retina. **(A)** Immunofluorescence staining of whole mount mouse retina for Collagen IV and $\beta 4$ -integrin subunit. **(B)** Enlarged image of one petal of retina showing restricted $\beta 4$ expression. **(C)** Immunofluorescence staining of whole mount mouse retina for α -smooth muscle actin (α -SMA) and $\beta 4$ -integrin subunit. Arrows show examples of α -SMA / $\beta 4$ co-localization in the arterial branch. of Scale = 1 mm.

Supplementary Figure S2. Integrin $\alpha 6\beta 4$ is expressed on the surface of human umbilical endothelial cells (HUVECs). HUVECs were immunostained with antibodies to the integrin $\beta 4$ subunit and analyzed by flow cytometry.
