

Supplementary Figure 2. Phenotypic characterization of PSCs. Cell size measurement of the various PSC cultures calculated by the length and width ratio of 50 cells for each PSC culture using FIJI software. PSC, pancreatic stellate cell; h-PSC, human primary PDAC-derived PSC culture; HPaSteC, PSCs from normal human pancreas; i-hPSC, immortalized human PSCs; i-mPSC C2 and C3, immortalized mouse PSCs clone 2 and 3.
