

Identification of homozygosity-rich genomic regions in seven Italian local turkey (*Meleagris gallopavo*) breeds

Figure S1. Box plot of F_{HOM} values calculated for each breed.

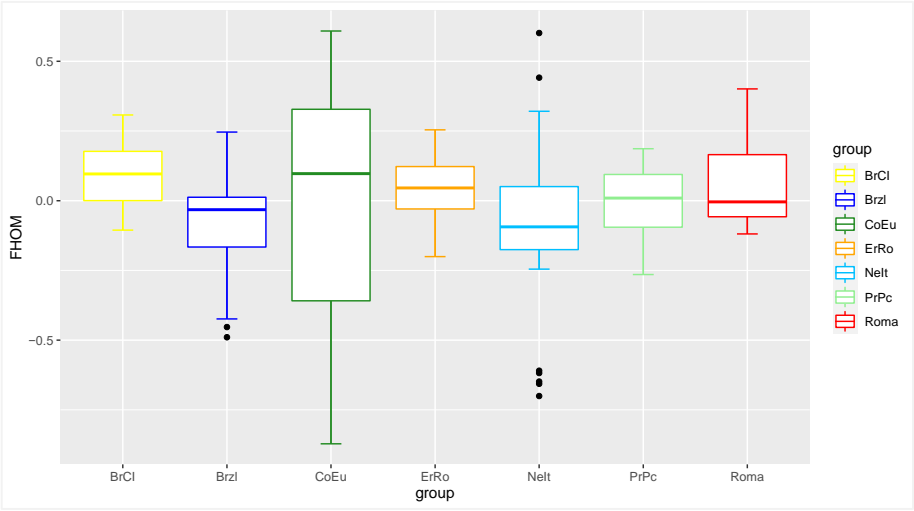

Figure S2. Box plot of F_{ROH} values for each class of ROH length

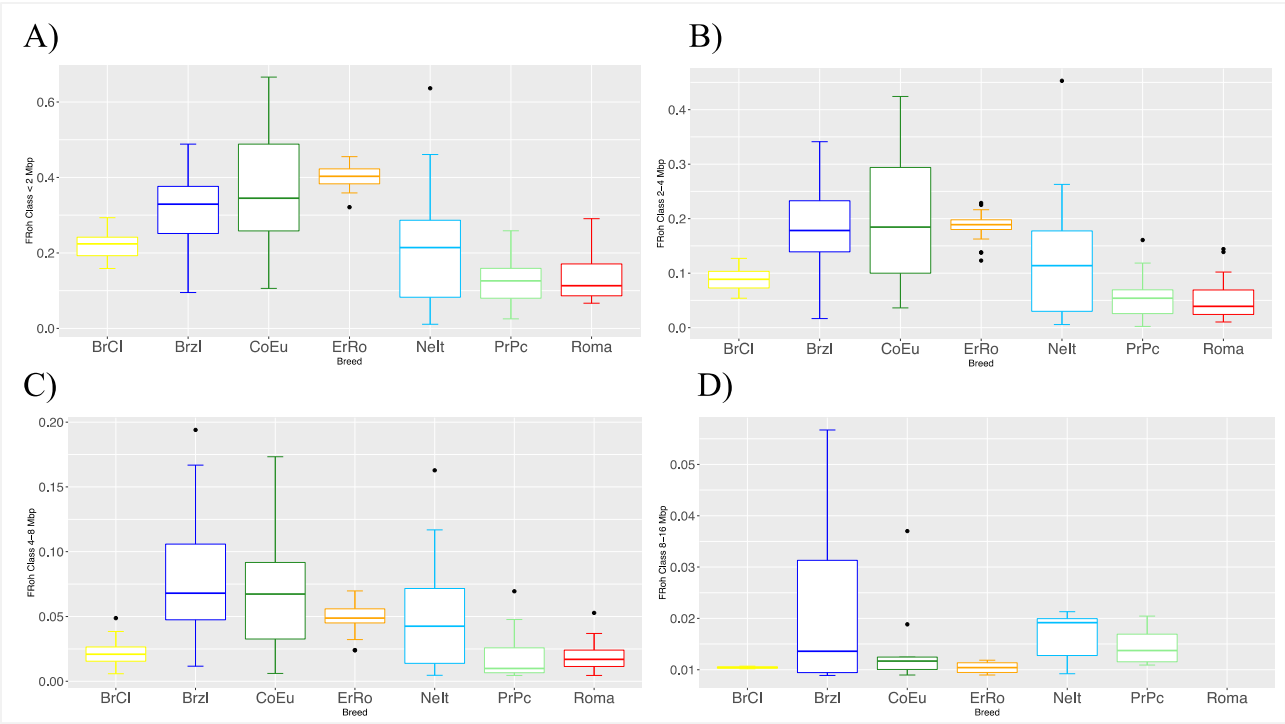

Figure S3. F_{ROH} values calculated for each chromosome.

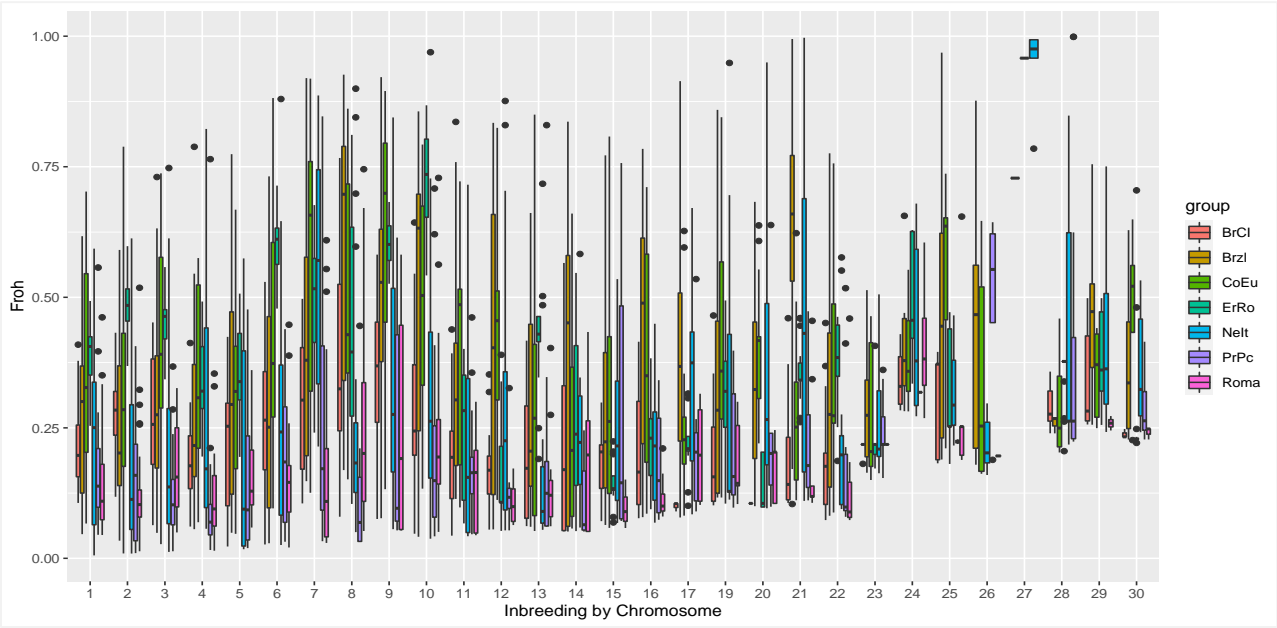

Figure S4. ROH_island on chr1 containing KITLG gene: homozygosity genotypes for all ErRo's birds.
