

# Time Variability Patterns of Eutrophication Indicators in the Bay of Algeciras (South Spain)

Jesús M. Mercado, Pablo León, Soluna Salles, Dolores Cortés, Lidia Yebra, Francisco Gómez-Jakobsen, Inma Herrera, Aitor Alonso, Antonio Sánchez, Nerea Valcárcel-Pérez and Sébastien Putzeys

**Figure S1.** Mean abundances of diatoms, flagellates and dinoflagellates calculated from the samples obtained in the euphotic layer of the four stations sampled during each research survey. Note that there are not available data for the surveys December 2012 and June 2014.

**Figure S2.** Means of temperature, salinity, nutrients and chlorophyll a calculated for the euphotic layer in the Bay of Algeciras (BA, dark columns) and Sotogrande (SG, clear columns). Vertical lines on the columns indicate the standard deviation.
