

Spartina alterniflora Invaded Coastal Wetlands by Raising Soil Sulfur Contents: A Meta-Analysis

Zhenzhen Zhao, Liyu Cheng, Chiquan He, Feifei Wang, Jialin Liu, Yuanhang Li, Xueping Chen, Xiaoyan Liu, Gaoming Lv and Daoyuan Wang

Supplementary Materials

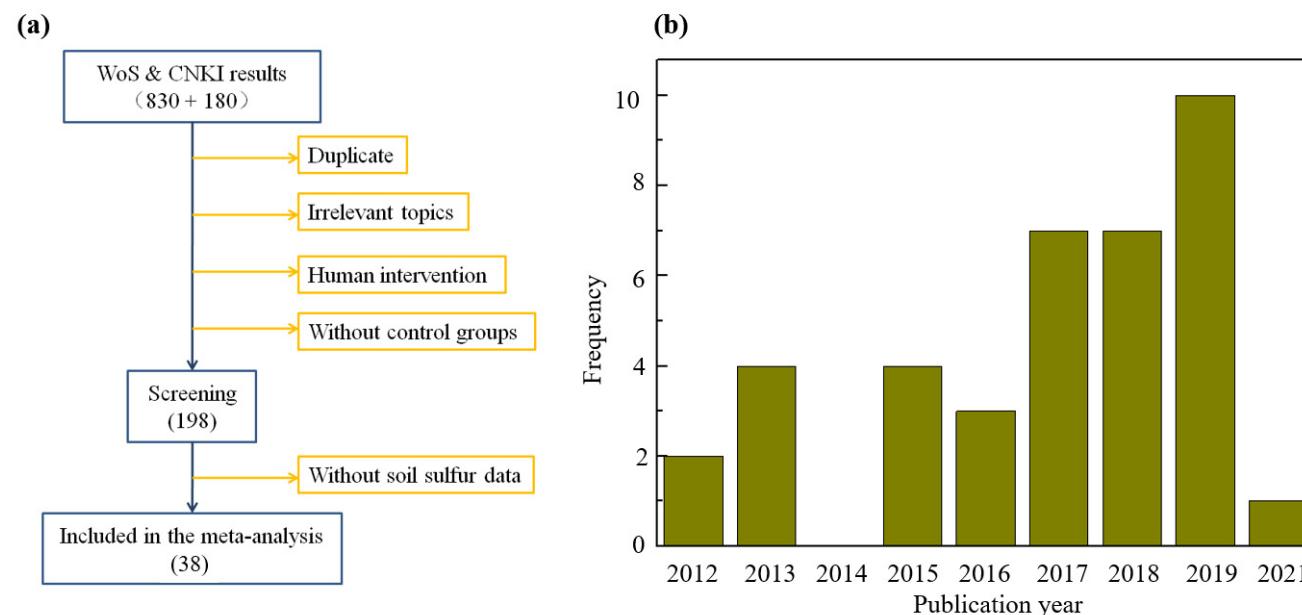

Figure S1. (a) The screening process used in the meta-analysis. Each yellow box represents studies screened out which did not meet the criteria.; (b) Evidence on the response of soil sulfur content after *S. alterniflora* invasion was synthesized in our database of researches published between 2012 and 2019 (The research published in 2021 was an unpublished study of our team when we did the meta-analysis). The most recent year in our database (2019) had the most published articles (n = 10).

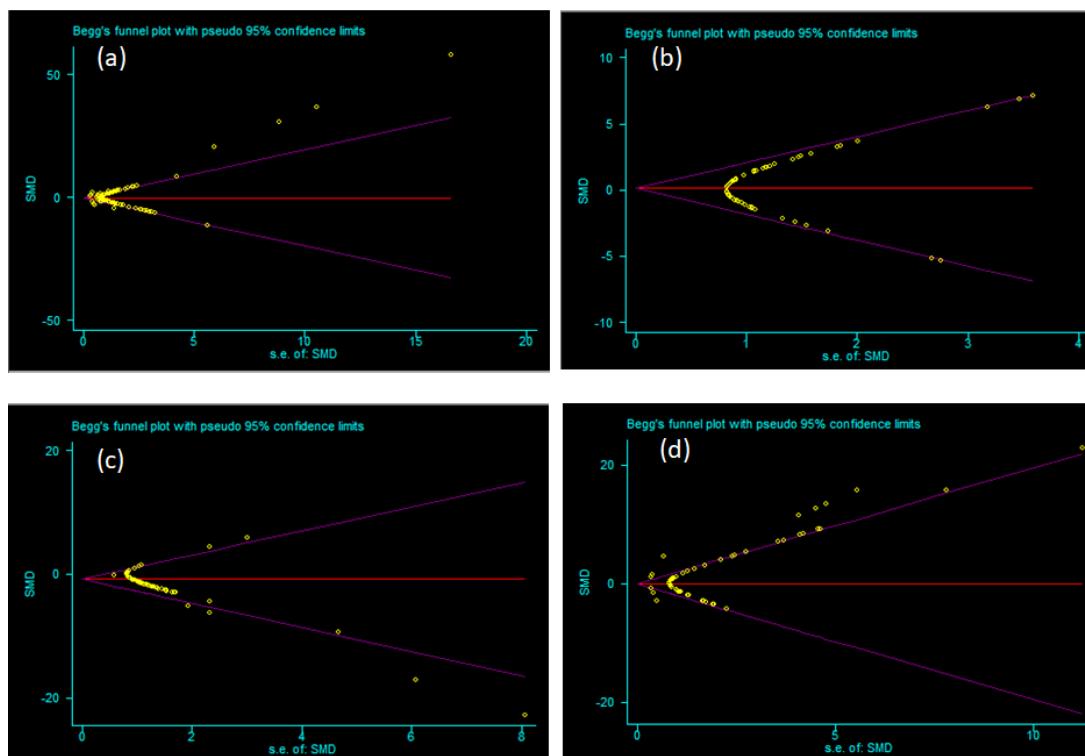

Figure S2. Funnel plots of the meta-analysis of the effect of *S. alterniflora* on soil (a) pH, (b) electric conductivity, (c) bulk density and (d) salinity.

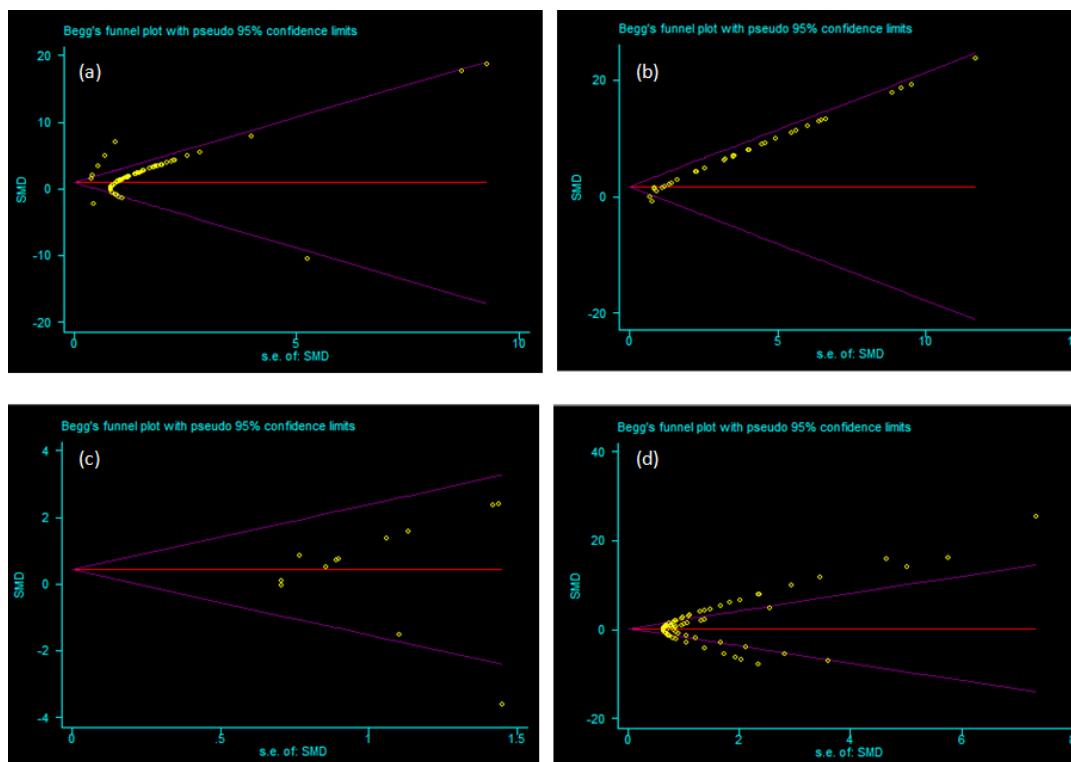

Figure S3. Funnel plots of the meta-analysis of the effect of *S. alterniflora* on (a) soil water content, (b) aboveground biomass, (c) underground biomass and (d) total carbon.

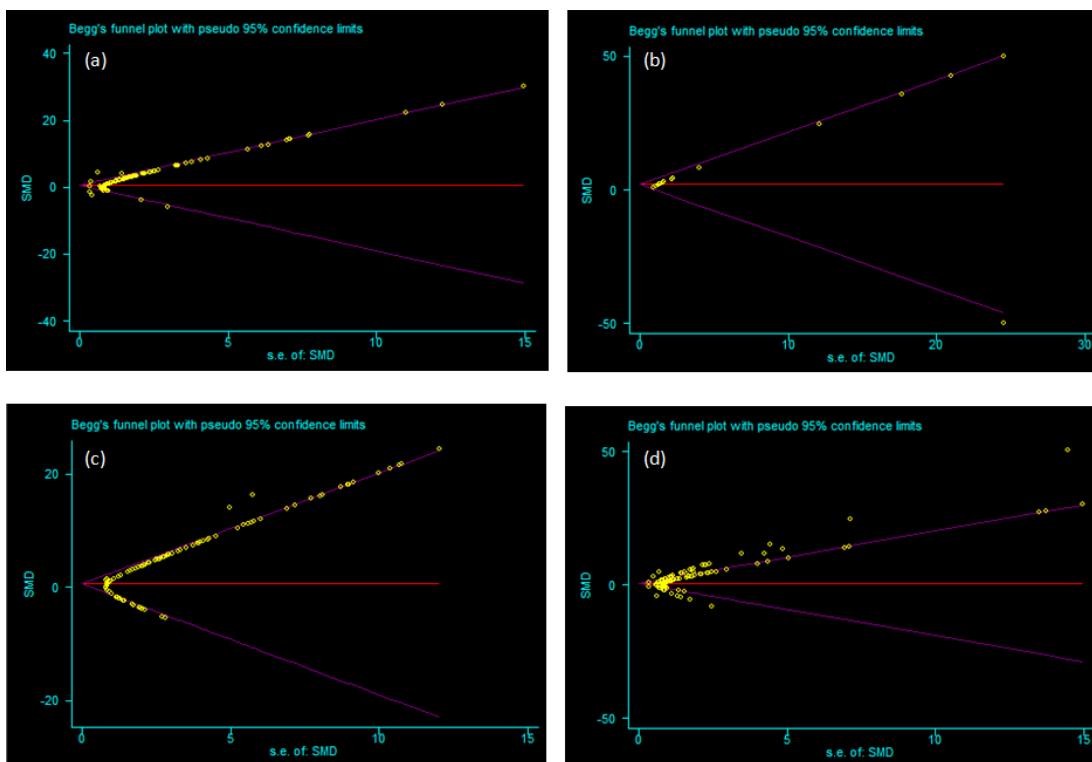

Figure S4. Funnel plots of the meta-analysis of the effect of *S. alterniflora* on soil (a) organic carbon, (b) microbial biomass carbon, (c) organic matter, and (d) total nitrogen.

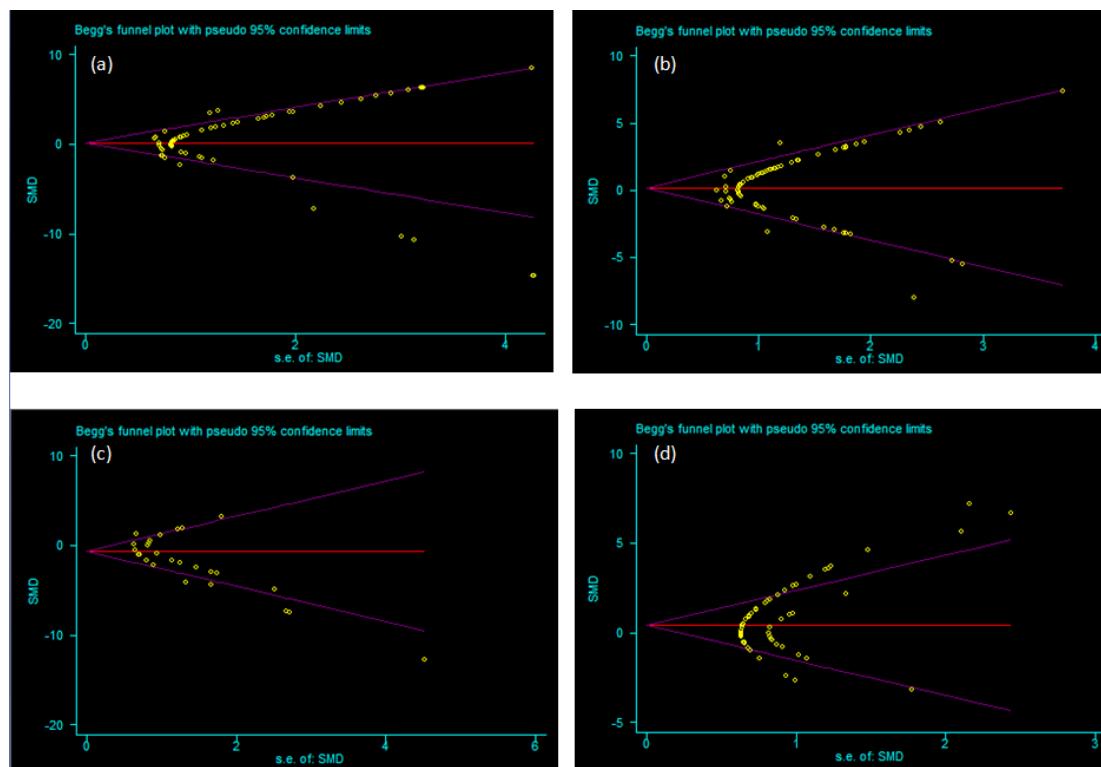

Figure S5. Funnel plots of the meta-analysis of the effect of *S. alterniflora* on soil (a) NH_4^+ , (b) NO_3^- , (c) C/N ratios, and (d) total phosphorous.

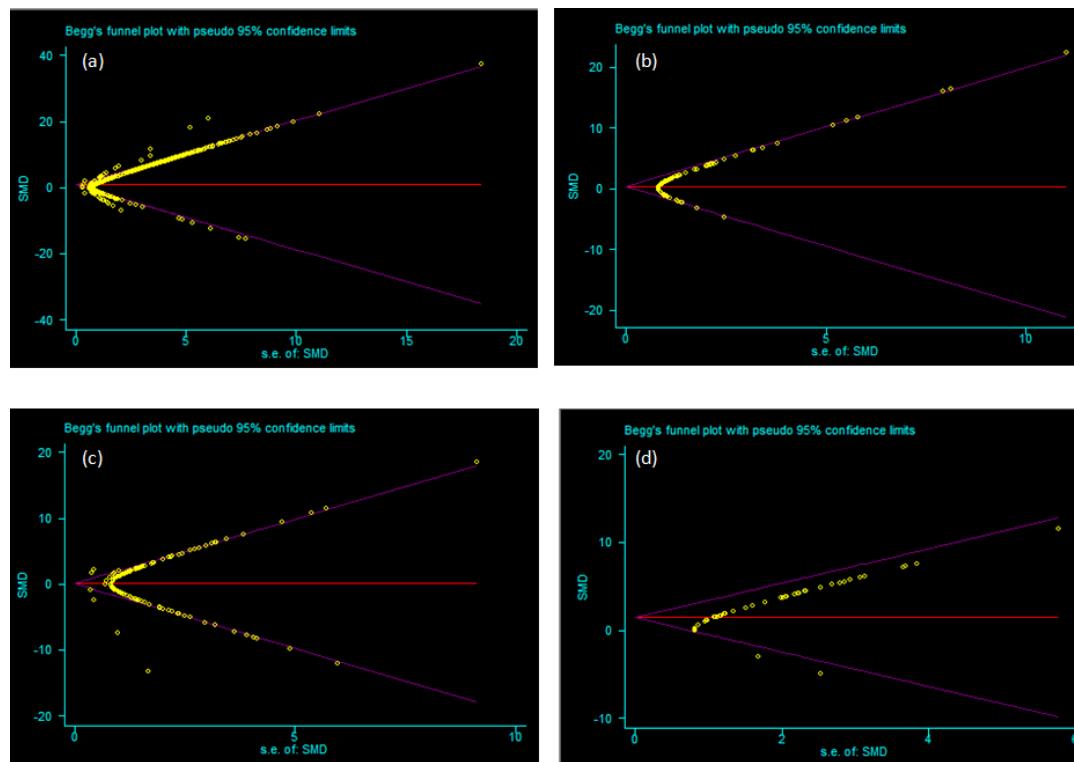

Figure S6. Funnel plots of the meta-analysis of the effect of *S. alterniflora* on soil (a) total sulfur, (b) available sulfur, (c) SO_4^{2-} , and (d) S^{2-} .

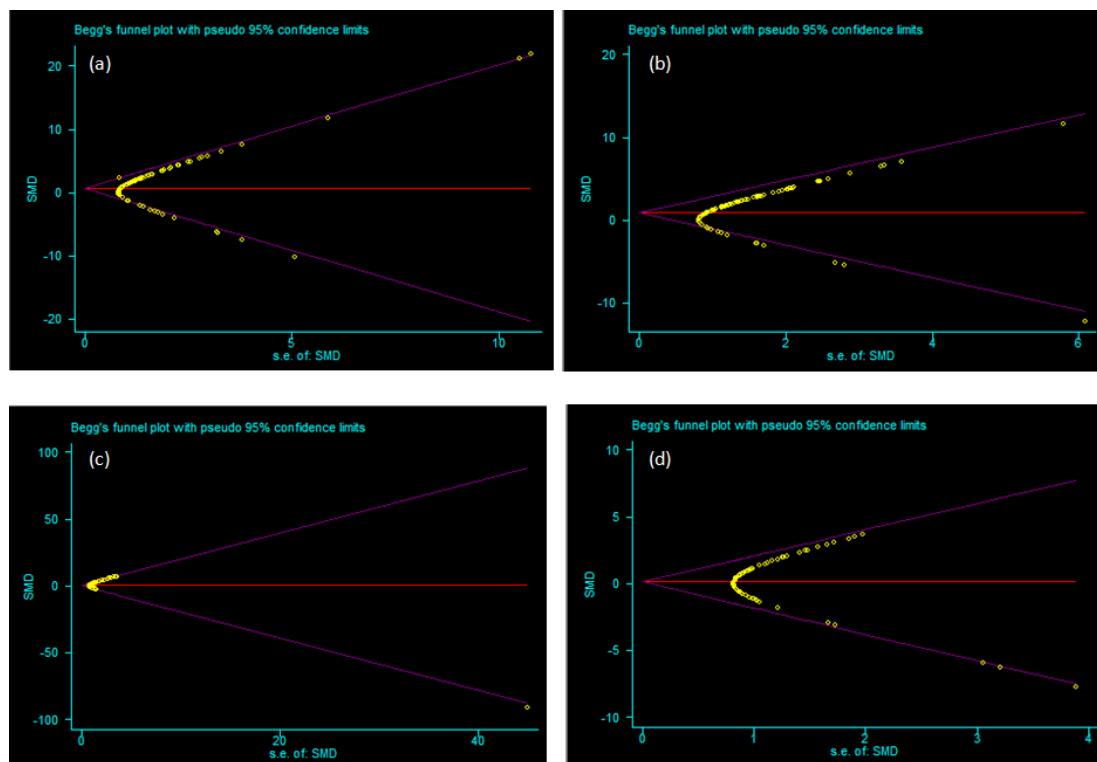

Figure S7. Funnel plots of the meta-analysis of the effect of *S. alterniflora* on soil (a) H₂O-S, (b) Adsorbed-S, (c) HCl-Soluble-S, and (d) HCl-Volatile-S.

Table S1. Basic information including literature source, site location, native species, native species life form, temperature, precipitation, sample years and soil properties extracted from the articles used in the meta-analysis. A “/” was for information not offered in the articles. (MF: mud flat; EC: electrical conductivity TC: total carbon; TN: total nitrogen; SOC: total organic matter; OM: organic matter; TP: total phosphorous; AP: available phosphorous; TK: total kalium; C/N: the ratio of soil carbon and nitrogen; SMBC: soil microbial biomass carbon; SMBN: soil microbial biomass nitrogen; TS: total sulfur; AS: available sulfur; DMS: dimethyl sulfide.
