

# **Viability of reclaiming municipal wastewater for potential microalgal based biofuel production in the U.S.**

May Wu,\* Sarah McBride, and Miae Ha

## **Supporting Materials I**

### **1. Municipal Wastewater Data**

Municipal reclaimed water data were collected from the Clean Watershed Needs Survey (CWNS) conducted by the U.S. Environmental Protection Agency (EPA) for the most recent data years, 2008 and 2012 (EPA 2012b, 2016a). The data sets were analyzed for effluent volume by water treatment levels (primary, secondary, and advanced) and by effluent discharge methods. Reclaimed water volume in this study represents the sum of secondary and advanced treatment effluent. Available reclaimed water is defined as the WWTP effluent currently discharged to the surface water, or outfall to surface water (OSW). WWTP facility data were aggregated to the county level. Table S1 below shows county level municipal wastewater flow and OSW flow.

Table S1. Municipal wastewater flow and treated water discharge by OSW at county level in the U.S.

State/county info			Flow in MGD		Discharge methods
