Supplementary material

The chemical structures of the different dyes used in this review are illustrated bellow. For the sake of clarity, the dyes have been divided in two broad groups, following the well-known classification of dyes into “azo” and “non-azo” dyes. The common name, structure and IUPAC name of the different dyes is indicated for all of the dyes.

Table S1. Common names, chemical structure, and IUPAC names of the different dyes referred to in this work.
