Divčibare	27.3 \pm 2.67	30.8 \pm 2.01
(b)		
Locality	Female	Male
Gobelja	17.7 \pm 0.75	17.7 \pm 1.40
Karaman Greben	17.2 \pm 1.12	17.4 \pm 0.98
Kukavica	18.3 \pm 1.06	18.5 \pm 0.95
Nebeske stolice	17.2 \pm 0.79	17.9 \pm 0.94
Mokra Gora	16.8 \pm 1.56	16.4 \pm 2.54

Table S3. The values of Procrustes distances (PD) and p values obtained by discriminant analysis in comparisons between the localities (below the diagonal of the table are the values in females and above the diagonal are the values in males) in (a) *L. agilis* and (b) *Z. vivipara*. Statistically significant values are bold.
