

**Table S1.** Lipase activity extracted from roots kept at room temperature for various amounts of time. Activities are mean values  $\pm$  confidence intervals ( $p = 0.95$ ;  $n = 4$ ).

Root storage time	Extracted lipase (U/mg roots)
1 day	$6.4 \pm 0.79$
11 months	$6.87 \pm 0.84$
19.5 months	$6.98 \pm 0.55$
