

Supplemental Figure S1. Expression profiles of three selected RGA genes in response to *S. sclerotiorum*. The data are shown as the mean \pm standard error. Transcript levels were statistically analyzed by an ANOVA with Duncan's multiple range test ($P < 0.05$) at one timepoint. Means in the plot followed by the same letter do not differ based on Duncan's multiple range test at $P < 0.05$ ($n = 3$).
