

Table S1. Summary of observation sessions performed for each colony

Colony	Foraging experiment		Fidelity experiment	
	Number of observations	Total number of observed entrances*	Number of observations	Number of active entrances
1	3	5	0**	1
2	3	8	2	4
3	1	3	0**	1
4	2	2	0**	1
5	1	6	2	5

1 *: Total number of active entrances recorded over the different sessions of observation.

2 **: Experiment of fidelity was not carried out because the nest showed only one entrance
3 when the observation was made.
