

Table S1: Butterfly species introduction, space, food habits, and number of individuals.

No.	Latin name	Family	Genera	Space	Diet	Individuals
1	<i>Pseudozizeeria maha</i> (Kollar, 1844)	Lycaenidae	Pseudozizeeria	L	P	327
2	<i>Catopsilia pomona</i> (Fabricius, 1775)	Pieridae	Catopsilia	U	P	295
3	<i>Pieris rapae</i> (Linnaeus, 1758)	Pieridae	Pieris	M	P	167
4	<i>Argynnis hyperbius</i> (Linnaeus, 1763)	Nymphalidae	Argynnis Fabricius	M	O	114
5	<i>Eurema hecabe</i> (Linnaeus, 1758)	Lycaenidae	Arhopala	L	P	74
6	<i>Chilades pandava</i> (Horsfield, 1829)	Pieridae	Eurema	M	P	51
7	<i>Pieris canidia</i> (Linnaeus, 1768)	Pieridae	Pieris	M	P	21
8	<i>Graphium sarpedon</i> (Linnaeus, 1758)	Papilionidae	Graphium	U	O	20
9	<i>Taraka hamada</i> (Druce, 1875)	Lycaenidae	Taraka	L	C	20
10	<i>Papilio polytes</i> (Linnaeus, 1758)	Papilionidae	Papilio Linnaeus	U	O	16
11	<i>Papilio xuthus</i> (Linnaeus, 1767)	Papilionidae	Papilio	U	O	10
12	<i>Elymnias hypermnestra</i> (Linnaeus, 1763)	Nymphalidae	Elymnias	M	O	9
13	<i>Colias erate</i> (Esper, 1805)	Pieridae	Colias	M	P	8
14	<i>Polygonia c-aureum</i> (Linnaeus, 1758)	Nymphalidae	Polygonia	M	O	5
15	<i>Papilio helenus</i> (Linnaeus, 1758)	Papilionidae	Papilio	U	O	3
16	<i>Hestina assimilis</i> (Linnaeus, 1758)	Nymphalidae	Hestina	U	SP	3
17	<i>Vanessa cardui</i> (Linnaeus, 1758)	Nymphalidae	Vanessa	M	P	3
18	<i>Parnara ganga</i> (Evans, 1937)	Hesperiidae	Parnara Moore	M	O	3
19	<i>Papilio memnon</i> (Linnaeus, 1758)	Papilionidae	Papilio	U	O	2
20	<i>Junonia almana</i> (Linnaeus, 1758)	Nymphalidae	Junonia	M	P	2
21	<i>Ypthima motschulskyi</i> (Bremer & Grey, 1853)	Satyridae	Ypthima	M	SP	2
22	<i>Graphium doson</i> (Felder & Felder, 1864)	Papilionidae	Graphium	U	O	2
23	<i>Vanessa indica</i> (Herbst, 1794)	Nymphalidae	Vanessa	M	O	1
24	<i>Neptis hylas</i> (Linnaeus, 1758)	Nymphalidae	Neptis	M	P	1
25	<i>Papilio paris</i> (Linnaeus, 1758)	Papilionidae	Papilio	U	P	1
26	<i>Kallima inachus</i> (Boisduval, 1836)	Nymphalidae	Kallima	U	S	1
27	<i>Mycalesis gotama</i> (Moore, 1857)	Satyridae	Mycalesis	M	S	1
28	<i>Menelaides protonor</i> (Cramer, 1775)	Papilionidae	Papilio	U	O	1

Note: U=upper activity space; M=middle activity space, L=lower activity space; SP=Plant-feeding monophagous, O=Plant-feeding oligophagous; P=Plant-feeding polyphagous; C=Carnivorous; S=Scavenging.

Table S2: The butterfly community indices of urban green spaces were measured across four levels of urbanization gradients, encompassing indices of Butterfly α -diversity, butterfly richness, butterfly abundance, and the butterfly Chao1 index.

Urbanization Gradient Type	Functional Group	Butterflies Group Variable	Butterflies α -diversity	Parameter		
				Butterflies Richness	Butterflies Abundance	Butterflies Chao1
City center areas	Vertical activity space group	All over	1.173	8	353	9
		All butterflies	—	—	—	—
		Plant-feeding monophagous	—	—	—	—
		Plant-feeding oligophagous	1.367	5	11	8
		Plant-feeding polyphagous	1.024	3	342	3
		Carnivorous butterfly	—	—	—	—
		Scavenging butterfly	—	—	—	—
		Upper space activities	0.254	3	69	3
		Middle space activities	0.284	4	112	5
		Lower space activities	0.000	1	172	1
Urban areas	Vertical activity space group	All	1.737	14	374	14.5
		All butterflies	—	—	—	—
		Plant-feeding monophagous	—	—	—	—
		Plant-feeding oligophagous	1.036	5	51	5
		Plant-feeding polyphagous	1.251	8	307	9
		Carnivorous butterfly	—	—	—	—
		Scavenging butterfly	—	—	—	—
		Upper space activities	0.342	4	160	4
		Middle space activities	1.387	7	87	8
		Lower space activities	0.584	3	127	3
Sub-urban areas	Vertical activity space group	All over	2.037	16	267	19
		All butterflies	—	—	—	—
		Plant-feeding monophagous	0.000	1	3	1
		Plant-feeding oligophagous	0.881	4	54	4
		Plant-feeding polyphagous	1.602	9	208	9.5
		Carnivorous butterfly	0.000	1	1	1
		Scavenging butterfly	0.000	1	1	1
		Upper space activities	0.811	7	101	8
		Middle space activities	1.457	6	127	6
		Lower space activities	0.238	3	39	4
All over		All butterflies	1.975	17	169	17.6

		Plant-feeding monophagous	0.000	1	2	1
Ex-urban areas	Diet group	Plant-feeding oligophagous	1.439	8	70	8
		Plant-feeding polyphagous	0.965	6	93	6
		Carnivorous butterfly	0.000	1	3	1
		Scavenging butterfly	0.000	1	1	1
	Vertical activity space group	Upper space activities	1.410	6	24	6.333
		Middle space activities	1.322	8	62	8
		Lower space activities	0.602	3	83	3

		Plant-feeding polyphagous	—	11	950	—
		Carnivorous butterfly	—	1	20	—
		Scavenging butterfly	—	2	2	—
All butterflies		Upper space activities	—	11	354	—
		Middle space activities	—	14	388	—
		Lower space activities	—	3	421	—

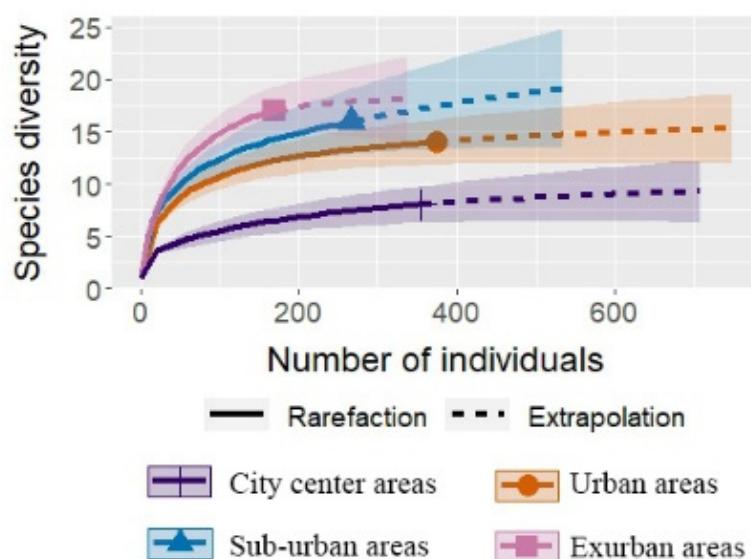

Figure S1: The rarefaction curve based on the number of individuals of species and the extrapolation curve of butterfly diversity in waterfront green spaces with different urbanization types. When the rarefaction curve flattens, the observed species diversity will stabilize gradually, and more individuals will only produce fewer new species.

Table S3: The table displays linear regression models (LRM) that illustrate the relationship between Shannon and species abundance of butterfly functional groups in urban green space under various types of urbanization. The

abbreviations used in the table have the following meanings: POD indicates Shannon of plant-feeding oligophagous butterflies, POP indicates Shannon of plant-feeding polyphagous butterflies, UAS indicates Shannon of upper activity space, MAS indicates Shannon of middle activity space, LAS indicates Shannon of lower activity space, and SA indicates species abundance.

Node	Butterfly Groups Type	Type of urbanization	(LRM)Model	F	R²	Sig.
1		City center areas	POD=0.137SA+0.437	0.7172	0.082	0.422
2	Plant-feeding	Urban areas	POD=0.035 SA +0.691	7.476	0.418	0.026*
3	oligophagous	Suburban areas	POD=0.025 SA +0.136	3.709	0.317	0.09
4		Exurban areas	POD=0.039 SA +0.268	7.975	0.499	0.022*
5		City center areas	POP=0.170SA-0.044	13.81	0.633	0.006*
6	Plant-feeding	Urban areas	POP=0.005SA+0.706	0.892	0.100	0.372
7	polyphagous	Suburban areas	POP=0.017SA+0.506	2.572	0.243	0.147
