As the authors of the title paper [1], it is with great regret that we inform the readership of *Buildings* that we have asked the journal's publisher, MDPI, to retract the paper from the scientific literature. The reason for this action is that this paper was part of a final year research project carried out by Suvash Chandra Paul and Md. Minhaz Rahman and supervised by Tarek Uddin Mohammed. Unfortunately, we did not include Tarek Uddin Mohammed as an author and he did not agree to its publication. We wish to apologise to the *Buildings* journal editors, MDPI, and of course to the wider scientific community for any inconvenience this action may have caused.
