

**Figure S2.** Percentage of DENV-positive cases according to geographical origin in years 2020-2023. The same color code, as defined in Figure 1, is used to represent the origin of the DENV-positive cases (blue = North, green = Central, orange = South). The error bars indicate 95% confidence intervals. The p-values are represented as follows: ns = non-significant, \*\* = < 0,01, \*\*\* = <0.001, \*\*\*\* = <0.0001.
