

Table S1. Sampling site, strain, and diameters of green-colored halo zone from each strain on ABTS agar plates. Diameters of halo zone indicate the laccase activity. Data are presented as means \pm standard deviations from triplicates.

Sampling Site	Strain	Diameter (mm)
Mae Mountain	B1A	33 (\pm 1)
	B2B *	35 (\pm 2)
	B4A	31 (\pm 1)
	B7A	32 (\pm 2)
Dukga Mountain	D1A	14 (\pm 0)
	D3A	23 (\pm 1)
	D4A	31 (\pm 2)
	D17C	24 (\pm 1)
	D17B	26 (\pm 2)

* B2B was finally selected for further study.
