

Figure S6. Total phytoplankton community and size classes (picoplankton (<10μm³), small (10–100μm³), medium (100–1,000μm³), big (1,000–10,000μm³) and very big (>10,000μm³) cells growth rate (short term, days 1–3) for the nutrient (N) and control (C) pre-grazed treatments (0, 40, 160 ind L⁻¹). Small circles represent the response of the replicates and big ones the mean between the replicates.
