Supplementary Material

Figure S1. Core and pan-genome analysis of *P. alcaligenes* strains present in (a) group I and (b) groups I and II. Boxes indicate changes in number of gene families relative to number of genes added sequentially; median values denoted with horizontal black line and standard deviation with vertical bars. Pie chart shows frequency distribution of ortholog groups of genes.

Figure S2. Predicted biological functions of genes present in specific region of *P. alcaligenes* AVO110. Specific genes were classified by their predicted biological function using Sma3s_v2 software [56].

Table S1. Primers used in this study.

Table S2. Relevant genes encoded in exclusive genomic region identified with GView in *P. alcaligenes* AVO110.
