

Supplementary information: Table S2. Organic acid production by selected PSB in liquid NBRIP medium.

		24 h	48 h	72 h	96 h	120 h	144 h
<i>Bacillus megaterium</i> PSB1	Citric acid						
	Formic acid	0.492*	0.468				
	Tartaric acid						
<i>Pseudomonas plecoglossicida</i> PSB2	Citric acid			0.220	0.418	0.484	0.655
	Formic acid	0.408	0.474				
	Tartaric acid		0.04				
<i>Bacillus cereus</i> PSB3	Citric acid						
	Formic acid	0.448	0.813				
	Tartaric acid						
<i>Pantoea eucrina</i> PSB4	Citric acid						
	Formic acid						
	Tartaric acid						
<i>Achromobacter xylosoxidans</i> PSB5	Citric acid						
	Formic acid	0.443	0.467				
	Tartaric acid						
<i>Pseudomonas koreensis</i> PSB6	Citric acid			0.353	0.364	0.34	0.284
	Formic acid	0.52	0.517				
	Tartaric acid						
<i>Burkholderia fungorum</i> PSB7	Citric acid			0.502	0.748	0.796	0.935
	Formic acid	0.500	0.513				
	Tartaric acid						
<i>Enterobacter cloacae</i> PSB8	Citric acid			0.115	0.028	0.022	0.022
	Formic acid	0.478	0.501				
	Tartaric acid						
<i>Advenella mimigardefordensis</i> PSB9	Citric acid			0.021	0.027	0.033	0.029
	Formic acid	0.489	0.520				
	Tartaric acid						

* Values shown are expressed in mg/L and correspond to the average of three independent experiments
