

Figure 1 is a 2D grid illustrating the relationship between LIM (cm) on the x-axis and Rib cage circumference (cm) on the y-axis. The x-axis ranges from 10 to 25 cm, and the y-axis ranges from 20 to 60 cm. The grid is divided into three weight categories: Over weight (red), Normal weight (green), and Under weight (blue). The Over weight region is the top-left area, Normal weight is the middle area, and Under weight is the bottom-right area.
