A

**Figure S1.** *SPP1* is a potential target of novel-miR-659. Expression of *SPP1* and novel-miR-659 (normalized to U6) were measured by real-time PCR at day 0, 3, 6, 9, 12, 15, 18 during pBMSCs adipogenesis induction, and the expression trend of novel-miR-659 was opposite to that of *SPP1* during pBMSCs adipogenesis.

B

**Figure S2.** Transfection effect of novel-miR-659. Expressions of novel-miR-659 and *SPP1* were measured by real-time PCR on day 14 of induction after novel-miR-659 mimics or inhibitors transfection. \*\*,  $p < 0.01$ ; \*,  $p < 0.05$

*PPAR $\gamma$*  and *FABP4* mRNA levels on the relevant days were examined by qRT-PCR(Figure 1B)

*PPAR $\gamma$ :*
