

Supplementary Figure S6. Genome heterozygosity for all breeds. To determine the significant differences between breed pairwise T-test with Bonferroni p-value adjustment was performed. Significance levels: 'ns' - non-significant, '*' - $p = [0.01, 0.05]$. Abbreviations: BBL - Belgian Blue; GER - German angus; HLS - Holstein; HRF - Hereford; LBG - Latvian Brown; LMS - Limousin; LZG - Latvian Blue; TYG - Tyrolean grey.
