Studies on the effect of microorganism type on changes in antioxidant activity (AA), total polyphenol content (TPC) and lactic acid efficiency (LA_e) - Table S1.

Table S1. Studies of the effect of the type of microorganism (*L. reuteri* MI_0168, *L. salivarius* LY_0652, *L. brevis* LY_1120, *L. acidophilus* MI-0078, *L. rhamnosus* MI-0272, and *L. plantarum* MI-0102) on changes in: antioxidant activity (AA), total polyphenol content (TPC), and lactic acid efficiency (LA_e).

| Fermentation time (days) | <i>L. reuteri</i> MI_0168 | | |
|------------------------------|---------------------------|------------------|----------------------|
| | AA mmol Tx/L | TPC mmol GA/L | LA _e % |
| 1 | 22.01±0.07 | 10.6±0.09 | 41 |
| 5 | 23.12±0.08 | 10.8±0.08 | 53 |
