After the results from a research project with former students of the university were published in *Applied Sciences* [1], it turned out that the example that was used by the students was taken from a thesis work carried out in an Indian company.

As soon as we heard this from our Indian colleagues, we reacted and asked the editorial office of *Applied Sciences* to remove the paper. The decision to retract has been made in cooperation with the authors of the article [1].

MDPI is a member of the Committee on Publication Ethics and takes seriously the responsibility to enforce strict ethical policies and standards. The published article [1] is retracted and shall be marked accordingly.
