

**Figure S1. Effects of USA300 infection and minocycline pretreatment on the weight of mice.** Variation of mouse weights during treatment (n = 8). control, saline-treated group; Mino, mice pretreated with minocycline and then challenged with the saline group; USA300, mice pretreated with saline and then challenged with the USA300 group; Mino+USA300, mice pretreated with minocycline and then challenged with the USA300 group.

**Table S1. Effects of USA300 infection and minocycline pretreatment on the percent survival of mice.**

Time (d)	Survival rates of mice (%)			
	control	Mino	USA300	Mino+USA300
1	100	100	100	100
2	100	100	100	100
3	100	100	100	100
4	100	100	100	100
5	100	100	100	100
6	100	100	100	100
7	100	100	100	100

control, saline-treated group; Mino, mice pretreated with minocycline and then challenged with the saline group; USA300, mice pretreated with saline and then challenged with the USA300 group; Mino+USA300, mice pretreated with minocycline and then challenged with the USA300 group.
