1. Experimental

1.1 Anti-tyrosinase activity

The assessment of the anti-tyrosinase inhibitory potential of UMS extracts followed established protocols, as detailed in prior work (Alam et al., 2023). As a benchmark, arbutin (ARB) was employed as a positive control. The percentage inhibition of tyrosinase activity was computed using Eq. 1.

$$(\% \text{ inhibition}) = \left[\left(1 - \frac{Abs_{sample}}{Abs_{control}} \right) \right] \times 100 \text{ -----(1)}$$

where $Abs_{control}$, and Abs_{sample} represent the absorbance of the control and the sample, respectively. Each sample was subjected to this analysis thrice to ensure robust and reliable results.

1.2 Cell culture and cell viability assay

Highly pigmented human melanoma cells (MNT-1), purchased from ATCC (Rock-ville, MD, USA), were kept alive at 37 °C under 5% CO₂ in Dulbecco's Modified Eagle Me-dium (DMEM) supplemented with 10% fetal bovine serum (FBS, Hyclone, Utah, UT, USA), streptomycin–penicillin (100 µg/mL each), 10% AIM-V medium, 0.1mM non-essential amino acid mix and 1mM sodium pyruvate (Invitrogen, Waltham, MA, USA). To confirm the cytotoxicity of UMS the 3-(4,5-dimethyl-2-thiazolyl)-2,5-diphenyl-2H-tetrazolium bromide (MTT) assay was used as described in our previous report [1].

Table S1. List of antibodies used in this study.

| Antibody | Dilution | Supplier | Catalog No. | Host | MW, kDa |
|----------------------|-----------------|---------------------------|--------------------|-------------|--------------------|
| Anti-TYR | 1:1000 | Abcam, Cambridge, UK | ab170905 | Rabbit | 60 |
| Anti-TRP-1 | 1:1000 | Abcam, Cambridge, UK | ab235447 | Rabbit | 61 |
| Anti-TRP-2 | 1:1000 | Abcam, Cambridge, UK | ab221144 | Rabbit | 59 |
| Anti-MITF | 1:1000 | Abcam, Cambridge, UK | ab140606 | Rabbit | 58 |
| Anti-p-p38 | 1:500 | Bioworld Technology, Inc. | BS4635 | Rabbit | 42 |
| Anti-p38 | 1:500 | Bioworld Technology, Inc. | BS3567 | Rabbit | 42 |
| Anti-p-ERK1/2 | 1:500 | Bioworld Technology, Inc | BS5016 | Rabbit | 42,44 |
| Anti-ERK1/2 | 1:500 | Bioworld Technology, Inc. | BS 6472 | Rabbit | 42,44 |
| Anti-JNK | 1:500 | Bioworld Technology, Inc. | BS3630 | Rabbit | 46,54 |
| Anti-p-JNK | 1:500 | Bioworld Technology, Inc. | BS4322 | Rabbit | 46,54 |
| Anti- β -actin | 1:1000 | Abcam, Cambridge, UK | ab8227 | Rabbit | 45 |

Table S2. Independent process variables with experimental ranges and levels for ultrasound-assisted extraction of UMS.

| Input variables | unit | Code | -1 | 0 | +1 |
|-----------------------|--------------------|-------|----|----|----|
| Ethanol concentration | % | X_1 | 40 | 60 | 80 |
| Time | min | X_2 | 15 | 30 | 45 |
| Temperature | $^{\circ}\text{C}$ | X_3 | 40 | 50 | 60 |
