

Supplemental Table S1. Results of literature searches in PubMed

To search for animal experimental studies, a comprehensive search of MEDLINE and PubMed databases was performed without restrictions on publication date or language, following the recommendations of the Systematic Review Center for Experimental Animal Research (SYRCLE). All articles were solicited from the databases using the searching terms “rat or mouse”, “stroke recovery”, “stroke repair” and “NADPH oxidase”. A key-word search for “rat/mouse/stroke/recovery/repair/NADPH oxidase” were used medical subject headings (MeSH) terms and all fields’ terms. Of the 21 articles identified in MEDLINE and PubMed (as of May 2024), 7 articles that did not meet the study criteria were excluded (two in vitro studies and five articles on other diseases). Finally, 14 articles were included in this review. The publication dates of these articles ranged from December 1, 2004 to May 14, 2024.
