

Supplementary Table S8. Comparison of OCTA angiography (OCTA) parameters in COVID-19 patients and age, sex, and laterality-matched controls. Mean  $\pm$ SEM (standard error of the mean) structural OCTA values. The temporal area in SCP (superficial), DCP (deep capillary plexus), and CC (choriocapillaris) plexus. Bold values denote statistical significance at the  $p < 0,05$  level.
