

Supplementary material Table S1. Search MeSH terms and keywords

<b>Category</b>	<b>Search Terms</b>
<b>1 (Heart disease)</b>	Myocardial Ischemia, Coronary Disease, Angina Pectoris, Acute Coronary Syndrome, Myocardial Infarction, coronary revascularization
<b>2 (Program, Intervention)</b>	program, intervention, rehabilitation, cardiac rehabilitation, exercise, physiotherapy, or physical therapy
<b>3 (Mode of delivery)</b>	Telemedicine, mhealth, m-health, mobile health, mobile application, mobile device, mobile communication, mobile phone, smartphone, smart phone, smartphone application, cellphone, cellular phone, telemedicine, telerehabilitation, tele-rehabilitation, virtual rehabilitation, remote rehabilitation, telehealth, tele-health, telemonitor, ehealth, e-health, digital health, mobile technolog*, website, web-based, tele-supervised, teletherapy, wireless technology, telemetry, videoconferencing, home-based rehabilitation, home exercise training, home-based cardiac rehabilitation, hybrid, tele-cardiology, telecardiology, telecare, tele-guidance, e-coach, e-coaching, e-consult*, tele-advice(Cochrane)
<b>4 (Wearable sensors)</b>	wearable sensors, accelerometer, sports watch, heart rate sensors, heart rate zones, pedometers, oximeter, pulse sensors, ECG monitoring, ECG sensors, photoplethysmography monitoring, PPG monitoring, PPG sensors,

Supplementary Table S2: The PRISMA checklist of items that should be included in reports of systematic reviews and meta-analyses

TITLE				
Title	1	Identify the report as a systematic review.		Title
ABSTRACT				
Abstract	2	See the PRISMA 2020 for Abstracts checklist.		Abstract
INTRODUCTION				
Rationale	3	Describe the rationale for the review in the context of existing knowledge.		Introduction, paragraphs 4 & 5
Objectives	4	Provide an explicit statement of the objective(s) or question(s) the review addresses.		Introduction, paragraph 5
METHODS				
Eligibility criteria	5	Specify the inclusion and exclusion criteria for the review and how studies were grouped for the syntheses.		Methods, Study inclusion criteria & Effect size measurements
Information sources	6	Specify all databases, registers, websites, organisations, reference lists and other sources searched or consulted to identify studies. Specify the date when each source was last searched or consulted.		Methods, Search strategy
Search strategy	7	Present the full search strategies for all databases, registers and websites, including any filters and limits used.		Methods, Search strategy & Study selection process
Selection process	8	Specify the methods used to decide whether a study met the inclusion criteria of the review, including how many reviewers screened each record and each report retrieved, whether they worked independently, and if applicable, details of automation tools used in the process.		Methods, Study selection process
Data collection process	9	Specify the methods used to collect data from reports, including how many reviewers collected data from each report, whether they worked independently, any processes for obtaining or confirming data from study investigators, and if applicable, details of automation tools used in the process.		Methods, Study selection process Effect size measurements & Data Synthesis
Data items	10a	List and define all outcomes for which data were sought. Specify whether all results that were compatible with each outcome domain in each study were sought (e.g. for all measures, time points, analyses), and if not, the methods used to decide which results to		Methods, Effect size measurements

		collect.	
	10b	List and define all other variables for which data were sought (e.g. participant and intervention characteristics, funding sources). Describe any assumptions made about any missing or unclear information.	Methods, Data Extraction, Effect size measurements & Data synthesis
Study risk of bias assessment	11	Specify the methods used to assess risk of bias in the included studies, including details of the tool(s) used, how many reviewers assessed each study and whether they worked independently, and if applicable, details of automation tools used in the process.	Methods, Risk of bias (quality) assessment
Effect measures	12	Specify for each outcome the effect measure(s) (e.g. risk ratio, mean difference) used in the synthesis or presentation of results.	Methods, Effect size measurements
Synthesis methods	13a	Describe the processes used to decide which studies were eligible for each synthesis (e.g. tabulating the study intervention characteristics and comparing against the planned groups for each synthesis (item #5)).	Methods, Effect size measurements
	13b	Describe any methods required to prepare the data for presentation or synthesis, such as handling of missing summary statistics, or data conversions.	Not applicable
	13c	Describe any methods used to tabulate or visually display results of individual studies and syntheses.	Methods, Data synthesis
	13d	Describe any methods used to synthesize results and provide a rationale for the choice(s). If meta-analysis was performed, describe the model(s), method(s) to identify the presence and extent of statistical heterogeneity, and software package(s) used.	Methods, Data synthesis
	13e	Describe any methods used to explore possible causes of heterogeneity among study results (e.g. subgroup analysis, meta-regression).	Methods, Data synthesis
	13f	Describe any sensitivity analyses conducted to assess robustness of the synthesized results.	Not applicable
Reporting bias assessment	14	Describe any methods used to assess risk of bias due to missing results in a synthesis (arising from reporting biases).	Not applicable
Certainty assessment	15	Describe any methods used to assess certainty (or confidence) in the body of	Not applicable

		evidence for an outcome.	
<b>RESULTS</b>			
Study selection	16a	Describe the results of the search and selection process, from the number of records identified in the search to the number of studies included in the review, ideally using a flow diagram.	Results, Study selection & Figure 1
	16b	Cite studies that might appear to meet the inclusion criteria, but which were excluded, and explain why they were excluded.	Not applicable
Study characteristics	17	Cite each included study and present its characteristics.	Results, Study characteristics, Intervention characteristics, wearable sensors & Table 1
Risk of bias in studies	18	Present assessments of risk of bias for each included study.	Results, Risk of bias of included studies and Figures 2 & 3
Results of individual studies	19	For all outcomes, present, for each study: (a) summary statistics for each group (where appropriate) and (b) an effect estimate and its precision (e.g. confidence/credible interval), ideally using structured tables or plots.	Not applicable
Results of syntheses	20a	For each synthesis, briefly summarise the characteristics and risk of bias among contributing studies.	Not applicable
	20b	Present results of all statistical syntheses conducted. If meta-analysis was done, present for each the summary estimate and its precision (e.g. confidence/credible interval) and measures of statistical heterogeneity. If comparing groups, describe the direction of the effect.	Results, Results of the meta-analysis
	20c	Present results of all investigations of possible causes of heterogeneity among study results.	Results, Results of the meta-analysis
	20d	Present results of all sensitivity analyses conducted to assess the robustness of the synthesized results.	Not applicable
Reporting biases	21	Present assessments of risk of bias due to missing results (arising from reporting biases) for each synthesis assessed.	Not applicable
Certainty of evidence	22	Present assessments of certainty (or confidence) in the body of evidence for each outcome assessed.	Not applicable
<b>DISCUSSION</b>			
Discussion	23a	Provide a general interpretation of the results in the context of other evidence.	Discussion

	23b	Discuss any limitations of the evidence included in the review.	Discussion, Limitations
	23c	Discuss any limitations of the review processes used.	Discussion, Limitations
	23d	Discuss implications of the results for practice, policy, and future research.	Limitations, Conclusion
<b>OTHER INFORMATION</b>			
Registration and protocol	24a	Provide registration information for the review, including register name and registration number, or state that the review was not registered.	Methods, study design
	24b	Indicate where the review protocol can be accessed, or state that a protocol was not prepared.	Not applicable
	24c	Describe and explain any amendments to information provided at registration or in the protocol.	Not applicable
Support	25	Describe sources of financial or non-financial support for the review, and the role of the funders or sponsors in the review.	Not applicable
Competing interests	26	Declare any competing interests of review authors.	Conflicts of Interest
Availability of data, code and other materials	27	Report which of the following are publicly available and where they can be found: template data collection forms; data extracted from included studies; data used for all analyses; analytic code; any other materials used in the review.	Not applicable
