

**Figure S1.** The area under the receiver operating characteristic curve of the initial AST, initial ALT, peak AST, and peak ALT in correlating with 30-day mortality.  $p = 0.469$  for initial AST vs initial ALT,  $p = 0.632$  for peak AST vs peak ALT,  $p < 0.001$  for peak AST vs initial AST, and  $p = 0.004$  for peak AST vs initial ALT.
