

Supplementary Figure S12

Supplementary Figure S12. Effect of various clinical parameters on percentage change in RANTES: (a) patients' BMI on $\Delta \text{RANTES}_{72\text{h}/24\text{h}}$; (b) anemia on $\Delta \text{RANTES}_{8\text{h}/0}$; (c) anemia on $\Delta \text{RANTES}_{72\text{h}/8\text{h}}$; (d) transfusion on $\Delta \text{RANTES}_{24\text{h}/0}$; (e) transfusion on $\Delta \text{RANTES}_{72\text{h}/0}$; (f) length of surgery (LoS) on $\Delta \text{RANTES}_{24\text{h}/8\text{h}}$; (h) length of surgery (LoS) on $\Delta \text{RANTES}_{72\text{h}/8\text{h}}$. Data presented as geometric means with 95%CI and analyzed using t-test for independent samples.
